

Moon 9 ~ Moon of Realization

Mirror Monkey Seed Realization

during our Earth Seeding Action Year

As we take action from new places in our beings, a new sense of reality emerges, and can be seen in the **Mirror** of the world and people around us. This brings us to a moment of transformation related to a new form that began to be birthed in us in early Nov.

The capable and playful **Monkey** in us is now, more than ever, curious and interested in discovering what's real, and what's not, what can be lived and enjoyed in authentic connection and unfoldment with the larger rhythms and cycles.

Mars is retrograde in Libra, hanging out for a long time in one of its least comfortable signs, so there may be a bit of an impatient edge in relatedness. We're being asked for more respectful courting and refinement than we've previously had the capacity for living.

This brings us to the only **Seed** wave in this entire Seed year! Through these portals, the seed of our Becoming Real sprouts. Now's the time to sink our roots deep, drink in the air and water, and grow!! Because, starting with the New Moon in Aries, then touched off by the Sun, we'll be seeing signs of the potent Uranus-Pluto-Jupiter T-square that will soon be joined by Mars in making a volatile Cardinal Grand Cross. A major challenge approaches...
