

Moon 11 ~ Moon of Liberation

Night Warrior Moon Liberation

during our Earth Seeding Action Year

Lingering tensions and transformational imperatives may be disquieting as we feel dissonance around what no longer serves us, what wants to be released, as individuals and culturally. This time of the **Night** can bring release from within, through living new stories and ways of being at home in ourselves.

We awaken deep within the dream, presencing as **Warriors**, fully embodying beneath the light of the Full Moon in Scorpio, as something in us heals and releases so that we can have a more expansive experience of the next level of beingness.

Mars goes Direct in Libra, so perhaps now we can be confident enough in ourselves to meet others and all of life with honor and respect. If not, and we stay insecure, things could get combative.

Jupiter trines Saturn, bringing flow around taking our places and living our ways of contributing in the world. We can step up to the next level, releasing what's not ours to do...

Let go into the magic of the Dark **Moon**, its initiating cycle, as we move toward integrating the moon's rhythmic ways as our own.

- 5/2 Venus into Aries
- 5/3 Sun trine Pluto
- 5/7 Mercury into Gemini
