

Moon 12 ~ Moon of Integration

Moon Wind Eagle Integration

during our Earth Seeding Action Year

Watch the waxing of the **Moon** through its cycle, from first visible crescent through to fullness and beyond, learning the magic of its signs and phase-changing ways, feeling them in your body and being as we look toward the 9 Moon year to come, which begins on July 26th. Mercury enters the Moon's sign of Cancer, slows down, then goes retrograde, giving us the opportunity to consider how to re-integrate nourishing and nurturing ourselves and others into our lives.

Then **Wind** blows through, rustling the trees, and if we pause long enough to breathe and listen, we may learn to hear, understand, and become infused with the speech of spirit, of the unseen, seeming magic that's all around and within us. May our words too carry the unseen.

The Full Moon in Sagittarius shines full of hope, excitement, and flowing potential. But a few days later, we get a reminder of that tense edge from the spring as Mars squares Pluto. Breathe through it.

The Summer Solstice kicks up a breeze that lifts **Eagle** into flight. Independence brings perspective, and a new integrative vision. Mars opposes Uranus, so your view may be challenged. Don't be dissuaded.
