

Moon 5 ~ Moon of Selfhood

Mirroring Monkeys Seed Selfhood

during our 9 Dragon Moon Realizations year

We look into the **Mirror** and upon deep reflection, remember who we are, birthing a new self-perception. The Sun and New Moon enter Sagittarius together, just as Uranus squares Pluto within 1 degree! This time brings the dissonance of internal tensions that will build over the coming weeks, strongly urging for a fundamental revolution in self-expression, even as an unbounded enthusiasm liberates us to freely seek the living of our authentic selfhood.

The Crossover point at the very center of the 260-day Tzolkin brings the moment of transformation related to the birth of Freedom begun way back in mid-July. To truly live free, we must become our selves.

Through the **Monkey** wave, we follow our curiosity, noticing what piques our interest in life. A playful exploration of what gives meaning becomes our journey of self-discovery. Have a good time!

This brings about a fertile time of **Seed** sprouting selfhood, of growing into ourselves, through the intensifying portals, to soon be able to meet the world in a new way. The Moon joins Jupiter in Leo (the sign of selfhood), as it has at the beginning or end of each of Moons 1 thru 5.
