

# Moon 6 ~ Moon of Balancing

## Seeding Earth with Dogs Balancing

during our 9 Dragon Moon Realizations year

Now, the **Seed** of our new self meets the whole of the world beyond our selves. Moon 6 starts on a 6 Moon day in the Seed wave, so balance comes from gardening by the Moon, in every sense of the word. You know in your being when it's time to plant, to weed, to prune, and to harvest. Organize your experience of life according to the natural rhythmic timing of this growthful unfolding.

We'll be continually balancing amidst tensions with the arrival of the 6th exact **Uranus square Pluto**, demanding a fertile revolution. Keep attuning to what you love. Venus comes in on a 13 Warrior day, inviting us to be so bold as to plant the seeds of our freedom deep in the **Earth** of our lives, where Uranus goes direct and sparks them into germinating new life on the Solstice and New Moon in Capricorn. Freedom ripens through our finding work life balance. Saturn moving into Sagittarius will help. It's time to have some serious fun. We've earned it! When we are working, focusing on the big picture grounds us in a greater sense of ease and positivity.

The Sun with Pluto and the Full Moon in Cancer welcome the **Dog**, who reminds us to meet the world beyond ourselves with love. To love our work. To organize and nest as ways of transforming. From here, the Love Warrior strides into a new attunement.
