

Moon 11 ~ Moon of Liberation

Hand lifts Sun into Skywalking Liberation

during our 9 Dragon Moon Realizations Year

Moving with the Fullness of the Scorpio Moon, we're given an opportunity to let go of holding on, to open our **Hands** and liberate ourselves from people, things, and approaches that no longer serve. In doing so, we reach a deeper level in authentic being, doing, and making. Mercury pops above the horizon in the west near the red eye of the Bull, giving us an important message as we attune to Skywalking and living as Wizards. Be sure you have your hand cupped to your ear and are listening carefully...

It's time to shine like the **Sun**, to liberate our light. There will be dissonance to the extent that we're hiding. It's time for the next level of visibility. Be the radiant center of attention, bestowing warmth and communicating what you know. Mercury goes retrograde in Gemini, challenging us to reapproach how we communicate what we know. Move beyond your teachers and their teachings. Saturn in Sagittarius rises in the east as the Sun sets, suggesting the time has arrived for us to mature into our own author-ity around knowing and learning.

Beyond the whole civilized, human-centered thing, is a life of inter-dimensionally journeying in space and time as **Skywalkers**. Time traveling as a part of everyday life is the next level. It's not way out there somewhere, or some fantasy. It's about us living as part of the vastness beyond the human, as humans, here and now.
