Serpents Mirror Monkeys Purposing

beginning our 10 Wizards Manifesting as Serpent Portals year

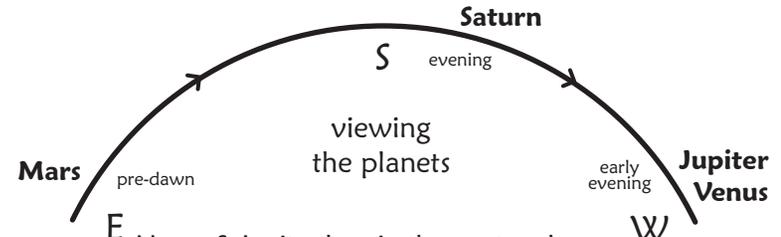

The **Serpent** wave and it's 10 open portal days in a row births us into an entire year of being Wizards, dancing the energy of the cosmos through our beings, vitalizing our physical bodies, and meeting each moment as it arises, effortlessly, and magically. There's a new maturity in our willingness and ability to meet and express What Is. On the 11 Eagle final portal day, the Wizard shapeshifts from serpent, becoming whooshing wing-song lifting off from the treetop.

The Full Moon in Aquarius shines like a **Mirror**. Reflection bringing perceptual shifts is central to our purpose this year, inspired by Jupiter's waning square of Saturn. Internal tension may arise related to maturely manifesting our unique ways and places of showing up and contributing in the world. Masterful enthusiasm is the key!

On the 13 Dog day, Jupiter moves from heartfelt Leo into practical Virgo. We've been freed to live and love, and now we expand through being in service to what we love, to the sacred. Attending to our integrity, the health of our physical bodies, and making with our hands all bring good fortune. Coming at the centerpoint of the 260-day Tzol'kin round, this is the moment of transformation!

Amidst the Perseids fireworks, **Monkey** reminds us that total transformation involves laughter, playfulness and curiosity. Better to discover and craft our sense of purpose, than to decide on one.
