

Moon 2 ~ Moon of Relatedness

Monkey Seeds Earth Relatedness

during our 10 Wizards Manifesting as Serpent Portals year

Riding **Monkey's** laughter we roll into Moon 2 just as the Sun moves into Virgo, reminding us to be playfully sacred in our crafting and tending, and to be curious mentors in relatedness.

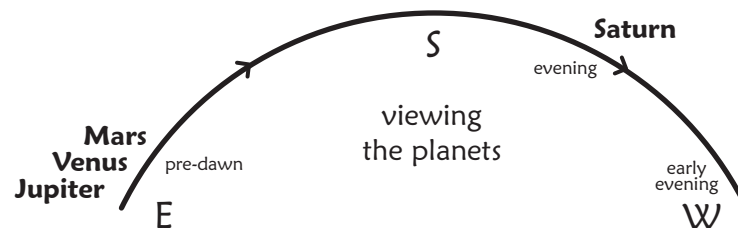

Then, the **Seed** cracks open and 10 portal days burst forth, echoing the 10 portals that brought the new year. Now, we're challenged to grow into living as open portals. Venus emerges as the Morning Star and joins Mars in Leo on a Dog day, fertile lovers attuning, each bringing self-love, creativity, and passion to the union!!

We move into the Yellow Realm of Ripening, into our **Earthed** relatedness. The Moon joins Venus & Mars for the 1st Divestment. Casting off her crown, Venus simply embodies her own sovereignty.

A partial solar eclipse brings physical concerns related to old wounds, even as the **Jupiter/Neptune opposition** challenges us (amidst a hazy focus) to earth a new story of sacred relatedness that actively honors both the health of the body and the needs of the spirit.

Mercury in Libra goes Retrograde, giving us a chance to re-think relatedness. **Saturn moves again into Sagittarius**, walking over previously covered ground with greater awareness that inspires us to more maturely live our ideals. A completion in relatedness happens as the last day of this moon is also the last day of the Earth wave.

- 8/23 Sun into Virgo
- 8/26 Sun conjunct Jupiter
- 8/27 Mercury into Libra
- 8/29 **Full Moon in Pisces**
