

Moon 11 ~ Moon of Liberation

Monkeys Seed an Earthed Liberation

during our 10 Wizards Manifesting as Serpent Portals year

Monkey's tricks are designed for our greater liberation, so it's a good idea to be willing to let go of what no longer serves us, or Monkey will surely mess with us as needed! Laugh at yourself and let go to be liberated to the next level, where life is grand!

The Sun and New Moon then Mercury and Venus all move through Taurus completing **Grand Earth Trines** with Jupiter and Pluto. This brings discovery and transformation around how we embody and express havingness, which plants a fertile **Seed** in rich soil that sprouts and grows over 10 potentizing portal days. The liberation of our Wizardry is upon us, as the Full Moon shines through the night with Mars (at its brightest) in Sagittarius, until the dawning of the 11 Wizard day, in Moon 11, when Mercury goes Direct. Our shapeshifting ability is needed in navigating the competing tensions of the **Mutable Grand Cross** formed by Venus' underworld journey into Gemini that now connects with Jupiter in Virgo, Saturn in Sagittarius, and Neptune in Pisces.

The last pass of **Jupiter square Saturn** reminds us to ripen into our **Earthly** existence by taking dedicated action in living our ideals at the next level, authentically making our contributions to the world.
