

# Moon 3 ~ Moon of Motion

## 3 Dogs moving in the Night as Warriors

during our 10 Wizards Manifesting as Serpent Portals year

One **Dog** howls as we move into Moon 3, the Moon of Motion. Having initiated some big relational changes during Moon 2, now we let love be what moves us, and we welcome new dogs and loves that come to run with us. The Full Moon in Aries is a Total Eclipse (seen in N. America), which could bring a stressful, pressing, looping energy. Remember to move in life from love, not effort!

**Nights'** steady motion teaches us how to move with and from the story that emerges and unfolds from within. Venus bravely lays down her scepter at the heart of the Lion, then moves together with the Moon into Virgo to tend the sacred fire. **Mercury goes Direct** at 0 degrees Libra; having completely re-imagined relatedness, now we live it! The Moon joins Mars & Jupiter in the Night sky, revealing the relational beauty dance, showing us how to harmoniously embody and communicate three-ness in motion.

In the Night and Warrior waves, **Jupiter trines Pluto**, bringing a sense of flow and the ability to accomplish things with much greater ease. Mars even comes over to join Jupiter, giving us plenty of oomph. Move on big new projects as if they will succeed; they're likely to! Taking two strong steps as **Warrior**s we walk into form...
