

Moon 9 ~ Moon of Realization

World-Bridging Storms for Human Serpent Realizing

during our 10 Wizards Manifesting as Serpent Portals year

Venus and the Moon come together before dawn for the 7th divestment, and Venus drops her robes, ushering in the Moon of Realization. We stand naked gazing into a **World-bridging** mirror, the mystical world making sure we feel it's presence and that we're *really* keeping it real.

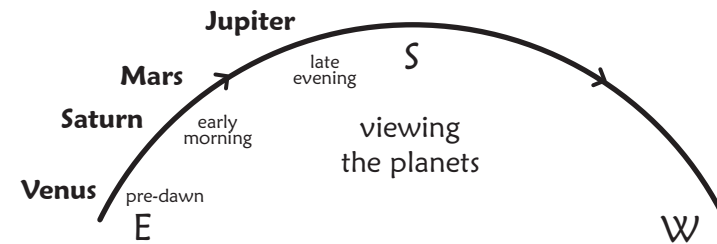

A Totally Solar eclipsing New Moon in Pisces touches off a **Storm** wave that brings the transformation of our energetic reality.

Jupiter trine Pluto helps us ground this energy into tangibility, which also provides an outlet for expansively expressing and diffusing the lingering energies of the waning Uranus Pluto square.

The Full moon in Libra is eclipsed as **Jupiter squares Saturn**. We must each find our way and take our place in making a real contribution to the **Human** community. With Saturn stationing retrograde, it's not about charging ahead. Remember what was initiated in May of 2000 when this Jupiter-Saturn cycle began. We're entering the final quarter cycle. Internal tension goads us to take action where perhaps we've been reluctant. Make it real now!

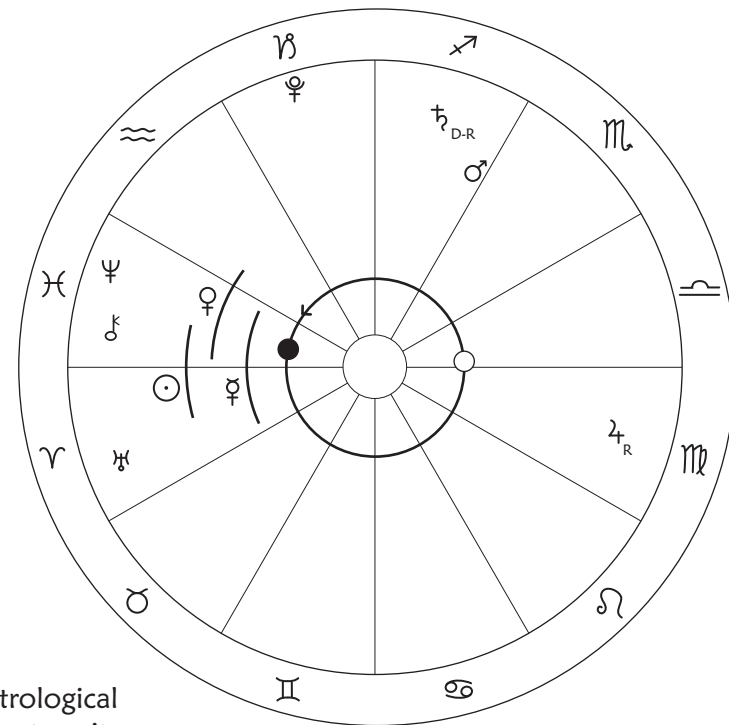

Serpent emerges, initiating the transformation of the story that's becoming real, into the embodiment of What Is...
