

# ● Moon 1 ~ Moon of Purpose

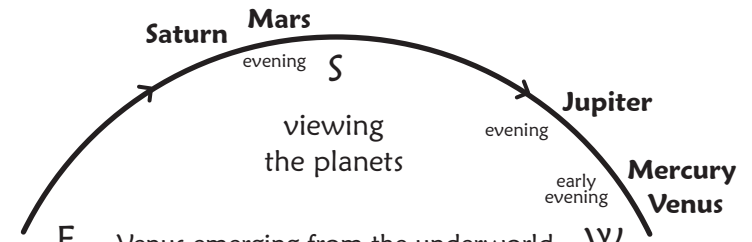

## **Moon illuminates Wind lifting Eagle into Purposeful flight** *beginning our Moon Storm Liberations Year*

The Moon Storm Liberations new year begins on an 11 Storm day in the **Moon** wave at midnight on July 26th, the exact moment of the Moon rising with Uranus in the east! With Uranus so ably embodying the Storm-like qualities of the unexpected and transformational energy, this is truly the moment of Moon Storm Liberation activation.

Our sense of purpose rides in from the realms of magic on the unseen breath of the **Wind**, spirit's speech and song, that we might become inspired and inspiring. Venus arises from a long stay in the underworld to become the Evening Star, shining in the west once again for the next eight months. On August 3rd, with a good western view just after sunset, you might see the very newly Crescent Moon conferring the first vestment upon Venus, a diaphanous gown. August 9th is the Asian "Valentine's" day, seventh day of the seventh lunar month, so offer your eloquence to who and what you love as the magpies form a bridge over the Milky Way River for the annual reuniting of the cosmic lovers ~ the Weaver Girl and the Cowherd.

Fly high like an **Eagle**, and with great vision see your purpose for this year from a new perspective, informed by **Jupiter opposing Chiron's** invitation into healing and teaching relationships & practical mysticism (as Venus and Mercury shine near Jupiter). At last, Mars leaves its retrograde shadow, breaking new ground. Impetus restored.

- 7/29 Uranus goes Retrograde until 12/29
- 7/30 Mercury into Virgo
- 8/2 Mars into Sagittarius
- New Moon in Leo**
