

Moon 10 ~ Moon of Manifestation

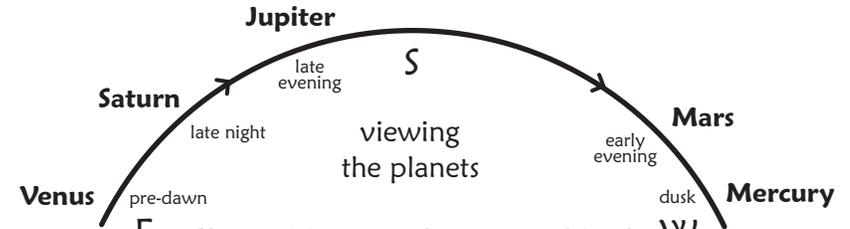

Moon stirs Wind who lifts Eagle into Manifestation during our Moon Storm Liberations year

The manifestation of magic shows up by **Moonlight**, under the **Full Moon in Libra shining with Jupiter** at it's brightest, illuminating the learnings of relatedness that are maturing into What Is. With **Mercury going retrograde** it's a good time to remember, as the 11 Storm day in the Moon wave that thundered in as the new year 260 days ago comes around again; this is the Walking and Talking day of the year. We now engage in relatedness to the liberated rhythm of our own energetic uniqueness. This is the magic.

Breathe in this next level of being, as the unseen becomes manifest in and through our spirit-infused speech and song in the **Wind** wave. As Morning Star Venus, we relinquish our crown when the Moon comes by, and spirit pours into our heads and flows through our beings. The **Taurus New Moon** invites us to enjoy the pleasures of manifesting as embodied beings.

Eagle brings an unexpected message as **Saturn squares Chiron the Wounded Healer**. Receive this message that's reminding us to live the gifts rather than the wounds, and take seriously its guidance, that we may be healer-teachers simply through the direct transmission of how we live.
