

Moon 3 ~ Moon of Motion

Mirroring Monkey tosses Seeds into Motion *during our Year of Skywalker Seeding Integration*

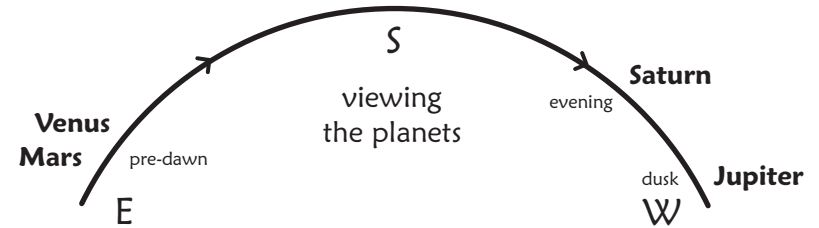

The slivered Moon visits Jupiter as we move into the **Mirroring** equal days and nights of the year, Sun rising and setting in the doorways of east and west as it moves into Libra, with a breeze blowing upon the gently swaying balances of the Autumn Equinox.

Amidst an unexpectedly expansive and self-expressive relatedness dance with **Jupiter in Libra opposing Uranus in Aries** for the last time, subtly moving **Mirrors** spark perceptual transformations as they bounce sunlight in all directions, revealing dimensional reflections within reflections, and showing us that which we can't usually see. This carries us to a moment of transformation at the center of this Liberating cycle of waves begun late last May.

Then the great liberating **Monkey** trickster waves its tail, and playfully, with its crafty hands, lifts us up to the next level. Be curious and open to discovering what that might be! A couple of hints: **Venus and Mars conjoin** in austere Virgo as they arise in the east, suggesting a mutual dedication to craft and service; and, expansive, fortunate **Jupiter moves into Scorpio** for the next year, entering the deep, sexual, potent, and intense mysteries...

Now, we move into the 13-day **Seed** wave in this 12 Seeds in the Skywalker wave year. The portals of deep possibility are opening. As they do, Moon visits Venus, with Mars nearby, for the 7th divestment. Venus drops her robe, and stands naked and rooted.
