

Moon 6 ~ Moon of Balancing

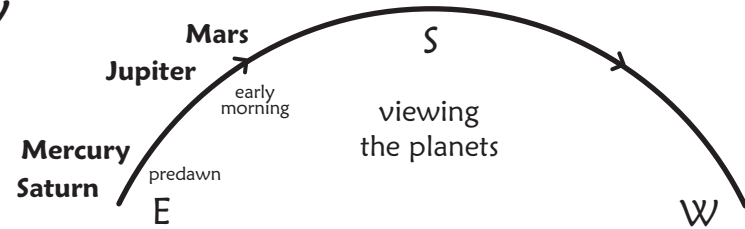

Warrior approaches Moon & breathes Wind Balancingly during our Year of Skywalker Seeding Integration

Amidst a meteor shower celebration, the ripening seed of our **Warriorhood** is realized. We meet the world beyond ourselves with strong presence, in a continuously balancing way, accompanied by the Moon visiting Mars then Jupiter. And so, comes another seeding, of our expanded capacity to journey, seeking to meet life well.

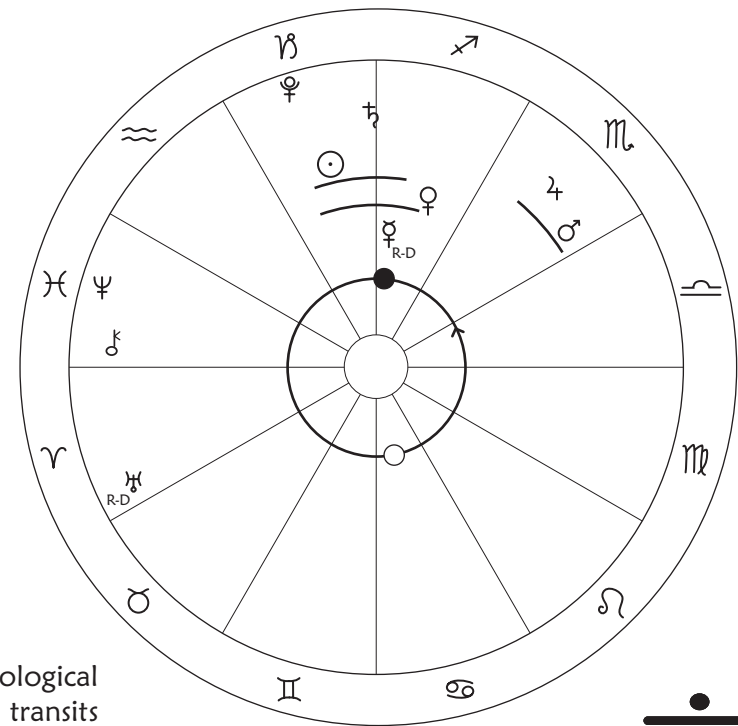

Moon initiates us into the magic that's always tangibly here if we but meet it, showing us how to change in a balancing way, moving with the phases. Moon waxingly welcomes us into a seriously Capricornian time as the planets gather. The dance is slow and steady. Then, **Saturn moves into Capricorn** (its home sign!) for the next 2 1/2 years inviting us to take responsibility for the forms and structures of our lives and having our own authority. On Winter Solstice, the Sun joins Saturn (as Mercury goes direct). Venus adds its welcome at Christmas. This is a good year for practical gifts!

We ring in the Gregorian New Year by the light of the giant glitter-ball Full Moon in Cancer (so you might want to stay snuggled up at home), watching it reach the heights at the mid of night then slowly drop. Listen for guidance from spirit on the **Wind**, and speak with resolve to loosen yourself up, that we might meet unseen magics. Breathe in the embodied potency of Mars & Jupiter coming together by the Scorpion's claw, expanding our power and reach, even as our sense of self and deservingness of love is transformed by the joining of the Sun, Venus, & Pluto in Capricorn. Exhale unworthiness.
