

# Moon 7 ~ Moon of Attunement

## **Wind lifts Eagle toward a Star Attunement** *during our Year of Skywalker Seeding Integration*

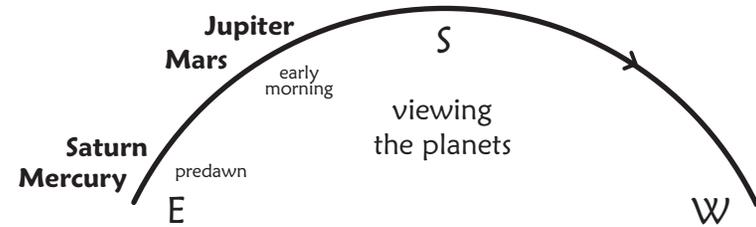

**Wind** blows strong atop the mountain, the breath of spirit filling our lungs as we tune in to the unseen and sing out its story, while beneath the mountain, deep in the night, the Moon visits Mars & Jupiter in Scorpio to confer. From those deep waters comes an upwelling of embodied potency, moving us with a strong current.

**Eagle** flies on the Wind's upswell, from the mountain top into the sky, the magic of flight bestowing spaciousness and perspective for the seeing eye. With no planets retrograde, we'll be turning that eye toward what's to come, and seeing anew. This seeding brings austere visioning with a practical eye, that drops the seed from a great height. Its growth comes through taking active responsibility.

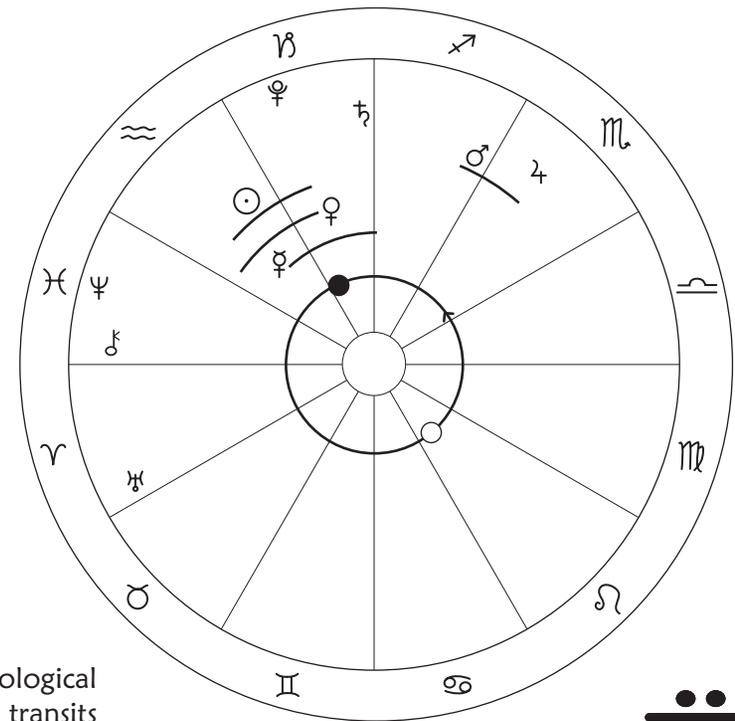

Midflight, our other new transit shows its face for the first time, as **Jupiter in Scorpio sextiles Pluto in Capricorn**. Positive potentiality abounds for deep feeling shifts that involve structural expansion & taking our own power, with a high level of intensity!

Look to the sparkling **Stars**, attuning to their dancing courses, and navigating by them as you ripen into living the magic in this purposefully Skywalking year. We've now become free and capable enough to be able to do so! The Total Lunar Eclipse in Leo brings a major reset in our attunement to our selves, our passions, and our creativity. Let unfolding beauty be your guide.
