

● Moon 1 ~ Moon of Purpose

Earth Dogs and Night Warriors live with Purpose

beginning our Year of Earth's Moon Freedom

Earth's Moon rises in fullness and freedom, showing the year's way of originating and ripening, waxing and waning, ebbing and flowing. Seven planets are retrograde this moonth, suggesting there's not much straightforward about freedom! Amidst a **Saturn trine Uranus & square Chiron** flowing dance of time and timing, we learn to take action and live our gifts rather than our wounds, here on Earth. Our purpose, returning to our origins, continually remaking our lives.

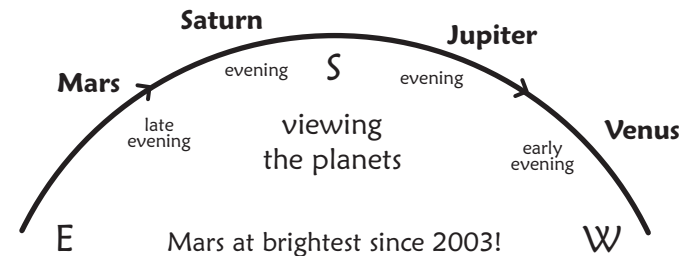

Notice what Moon activates, all year long. Moon with Mars (at its brightest!) shines in fullness this first night of the year, into the **Dog** wave, bringing a **Total Lunar Eclipse**, as all the sunrises and sunsets of Earth pink the Moon. Loving and working freely, strongly, and passionately is our charge. Let the reset of the eclipse change you.

We plunge into the dark of **Night**, glancing a solar eclipse, then the emerging Crescent Moon visits Venus (nestled w/ the Goddess' heart) for the 6th vestment, conferring a 3rd eye activating scepter. Heartful intuition offers a new story of sovereignty to be lived from within, at home in the deep intense watery journey of **Jupiter trine Neptune**.

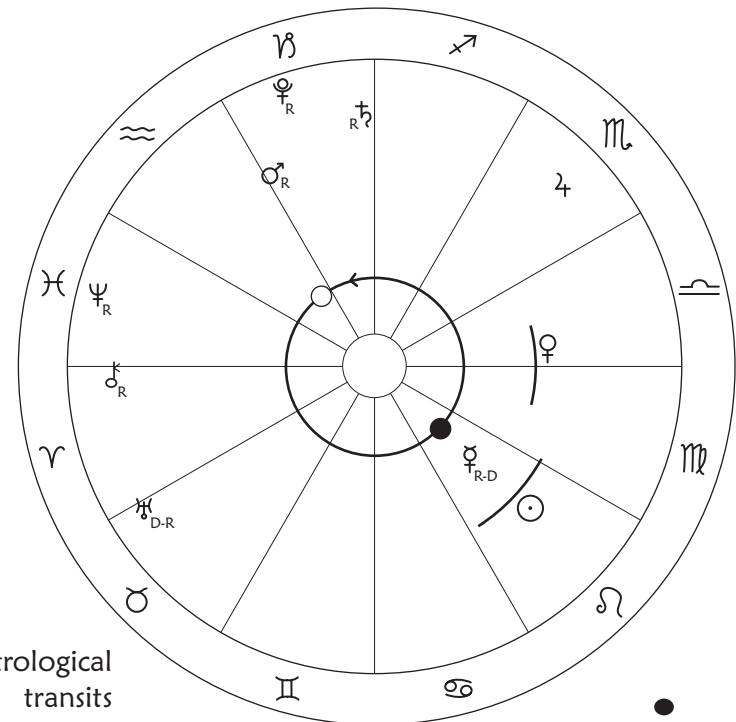

Warrior reminds us to freely embody our strength, and by the light of Moon shining with Mars, once again, we step from a grounded and purposeful place into meeting the challenge of relatedness.
