

Moon 10 ~ Moon of Manifestation

Earth Dog roaming Night Manifests

during our Year of Earth's Moon Freedom

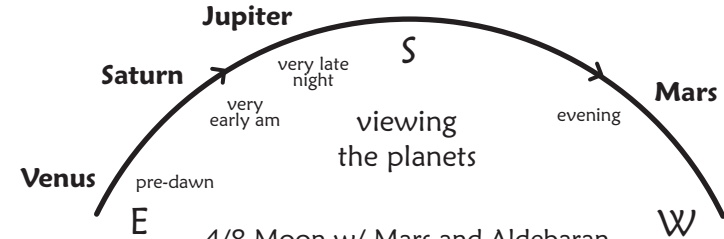

We live on **Earth**. This is our home, in the solar system, galaxy, and universe. Our purpose this year has been to learn to navigate this earthed life through synchronicity, to ground in embodiment, and to move with the shifting tectonic plates that continually shake up the seeming solid. This brings ripening.

Dark Moon in Aries waxes us to a 13 Moon day in this Earth wave. The same sign/number as was on the 7/26 new year comes around again. This is our Walking and Talking day. We've lived and learned through a full cycle of waves, and meet this energy from experience as What Is. Living **Earth's Moon Freedom** becomes manifest as our new form. This is the culmination of a 13-year Moon journey that has instilled in us a foundational maturity in being Humans on Earth living Moon rhythms, cycles, & signs. Gift our beloved Moon!

Let's run with our **Dogs**, the beings we love and enjoy, howling with delight by the light of a second Libra Full Moon and Sun into pleasurable Taurus. Love is what is. Then Sun and Uranus spark together amidst a Storm, the unexpected manifest! Love what is.

Night stirs the deep. Feel your potency being awakened! At home in your own storied being is a mature place to reside and move from in life. As we migrate from Manifestation into Liberation, Moon visits Venus for the 6th divestment. Relinquishing the girdling belt, we flow from the elixir field of our 2nd chakras.

- 4/5 **New Moon in Aries**
