

Moon 11 ~ Moon of Liberation

Night Warrior by Moon Liberated *during our Year of Earth's Moon Freedom*

In the quiet depth of **Night**, we release an old worn out story that's made us toss and turn, enabling a more liberating dream to emerge. Before this first dawning of the Moon of Liberation, for a 2nd morning, a moment of attunement to a beauty portal is offered as Moon visits Venus for the 6th divestment. We set aside a 2nd belt that has girdled us, releasing us into the pleasures offered by New Moon in Taurus. Here's to being at home in our bodies, in the dark.

We ripen into **Warriorhood** through meeting dissonance with embodied presence, appropriate protections, and respectful engagement, rather than pulling in, lashing out, or manipulating to get what we want. Meet this next level well. Like Mars, we balance on the tip of the boot of a Gemini Twin, while crossing the great Milky Way river. Tremendous strength is conferred by the Scorpio Full Moon, with Venus conjunct Uranus, inviting us to let go into this liberating empowerment. Be unapologetically powerfull.

Moon wanes with loveliness, visiting Saturn along the way, showing us how to release. Moon, as an ever-changing form being, carries us into the realm of magic, liberating us from attempting to live a life in which we try to "be" any one thing, or be "done" with anything. Embracing the reality of rhythmic waxing and waning releases the held tension of our insistence, making room for magic to unfold. Love the Moon up! Live each phase of this lunar cycle from Full to Dark as it carries us into the Moon of Integration.
