

Moon 12 ~ Moon of Integration

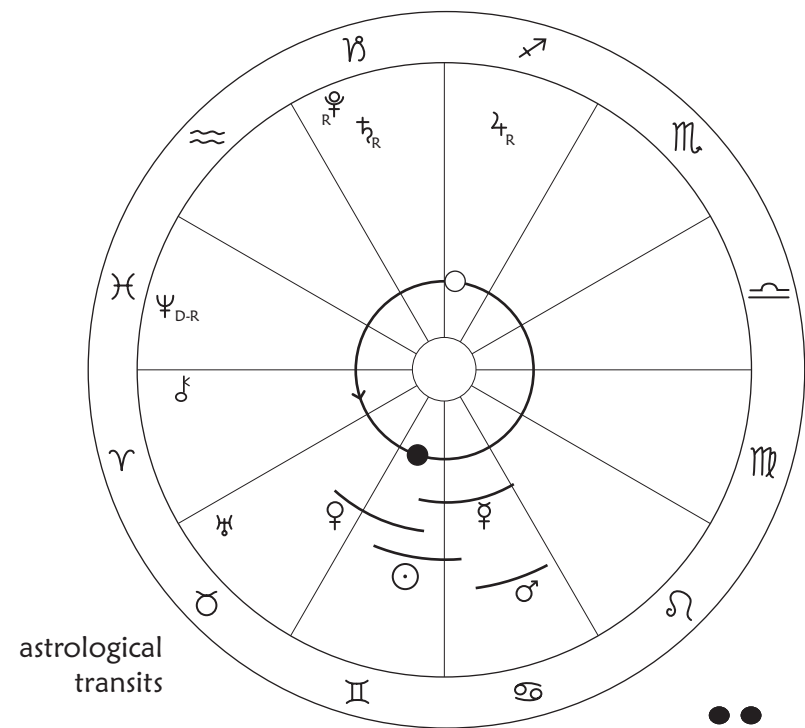

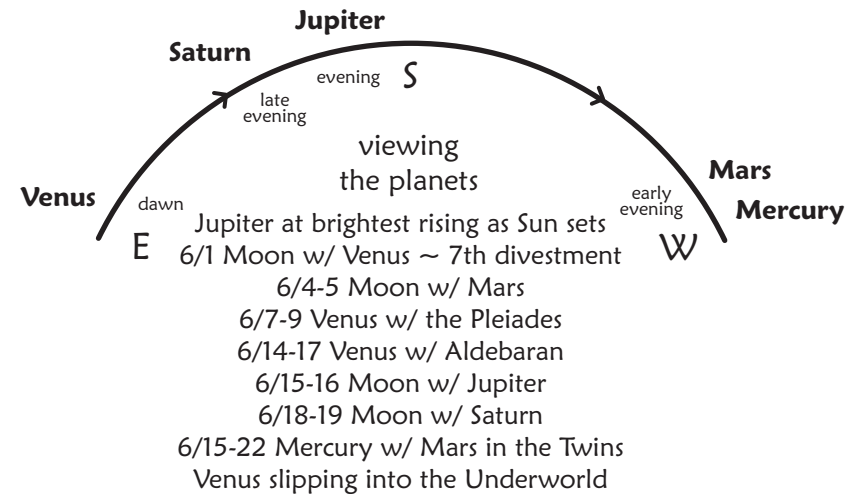

Moon shines and Wind lifts Eagle as we Integrate *during our Year of Earth's Moon Freedom*

Real earthly presence integrates us with **Moon** magic, crystallizing our new form. Waning Crescent Moon visits Venus before dawn in the east for the 7th divestment. We drop our robes and stand naked before an activating and liberating storm, which carries us into the interestingly stimulating Dark Moon in Gemini.

Moon waxes as **Wind** speaks spirit into this world, inspiring breathes that infuse us with the essence magic of all that's unfolding. Venus dances with the Pleiades low in the west and Jupiter rises as Sun sets, shining its brightest blessing throughout the night. All the while, **Jupiter in Sagittarius square Neptune in Pisces** draws in, and internal tension builds from airheaded flights of fancy. Seek meaning and feelingly converse with spirit to dispel the tension. This energy peaks as nearly Full Moon visits Jupiter, juicing up the expansive and fortunate side of the equation.

By the light of Full Moon in Sagittarius, **Eagle** flies on the words of wind, soaring the vast expanses, seeing what's been and what's to come with perspective, and integrating what's left into a new, more complex form of beingness. Moon visits Saturn for **Saturn in Capricorn sextile Neptune in Pisces**. There's positive potentiality for integrating the tangible and intangible in service to life. We take our place in the world, doing what's ours to do, infused with spirit & imagination amidst a Summer Solstice storm of selfhood.
