

# Moon 5 ~ Moon of Selfhood

## **Wizard Hands Sun into Selfhood**

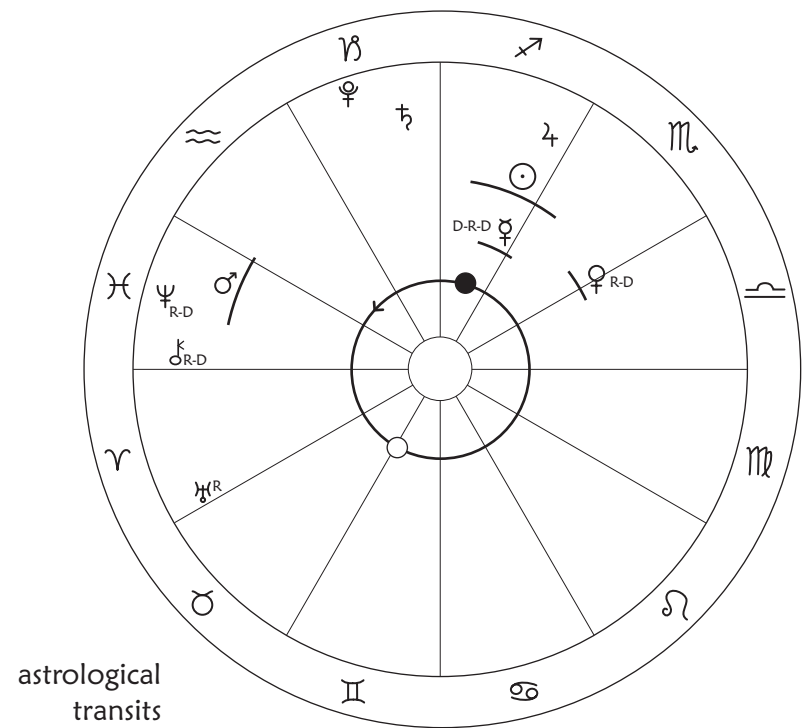

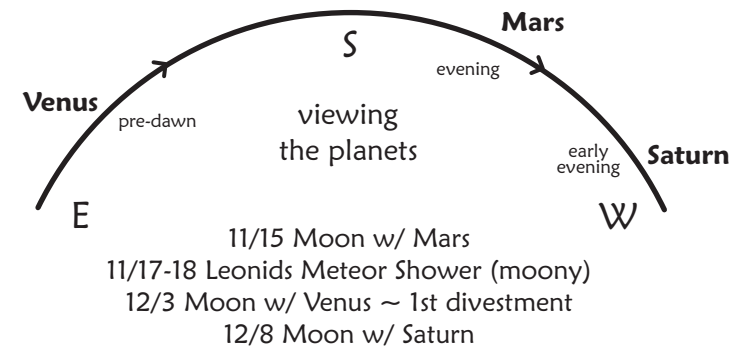

during our Year of Earth's Moon Freedom

Our new **Wizard** form gains selfhood, in a continually shapeshifting way. Having a solid sense of self is no more, so embrace the mystery! Effortlessness in meeting the moment is our guide, as Mars and Moon greet Pisces and we swim with the fishes, while Venus stations direct with Spica (the seed jewel in the hand of the Goddess) and Mercury goes Retrograde. Forward, pause, then back, pause, then forward again, these are the steps to the graciously adorning dance of selfhood.

We have **Hands**, ability and agency for making, and in the making we make something of our selves. Take the ideas born with the Gemini Full Moon and the enthusiasms of the newly Sagittarius Sun into crafting a new life and experience of selfhood. On a 13 Storm portal day, Venus shining as the Morning Star is visited by the waning Moon for the 1st divestment. We reach up and remove our crown, activating freedom.

**Sun** dispenses radiance generously, living its nature, warming the waning season with its autumnal glow. This is enough, for the Sun and for us, to simply shine. Mercury and Chiron turn direct around the Sagittarius New Moon, in this time of engaged thought and learning.
