

Moon 9 ~ Moon of Realization

Monkey Seeds Earth with Realness

during our Year of Earth's Moon Freedom

Monkey trips along, curiously, discovering and crafting, as our new form becomes real. This is a time for tweaking, for looking closely at what is about to come into form through our actions and then seeing what more or how different it could be! Then, make it so. This is mastery in crafting, not just fulfilling a vision, but allowing for the conversation with what is wanting to unfold and moving with it. Creating while being created!

Seed grows, changing forms from seed, to sprout, to plant, to flower, and to fruit that feeds another seeding, each ripening in its own way amidst the open portal of transformation that is real life. Balancingly, equinox Sun rises in Aries and Full Moon sets in Libra, full orbs shining through the doorways and upon the growing plants. Welcome the changing season, a year marker honored by all real cultures.

Mars shines with the Pleiades & Mercury dances with Neptune in Pisces. A dreamy pleasurable vagueness in repose becomes more intuitively creative and emergent as Mercury turns direct.

We return to the **Earth** wave, in this year that began in the Earth wave. Ripening into realness as earthed beings, we navigate by synchronicity and ground thru embodiment. Push your roots deep! Moon cruises by Venus for the 5th divestment. We set aside our ring of power, trusting in our own agency and will to make real.
