

Moon 12 ~ Moon of Integration

Skywalker Worldbridges a Storm of Integration *during our Year of Wizard Originating*

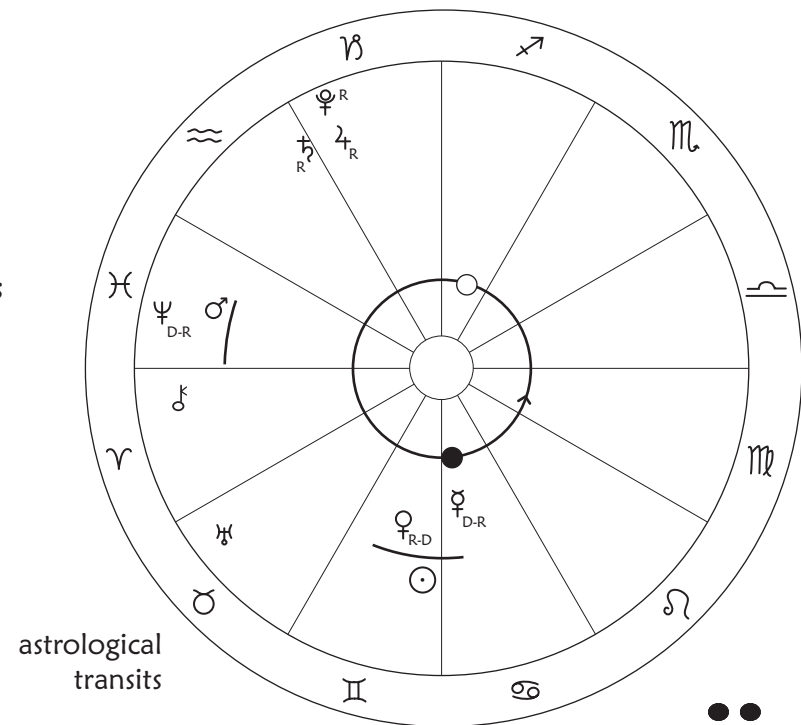

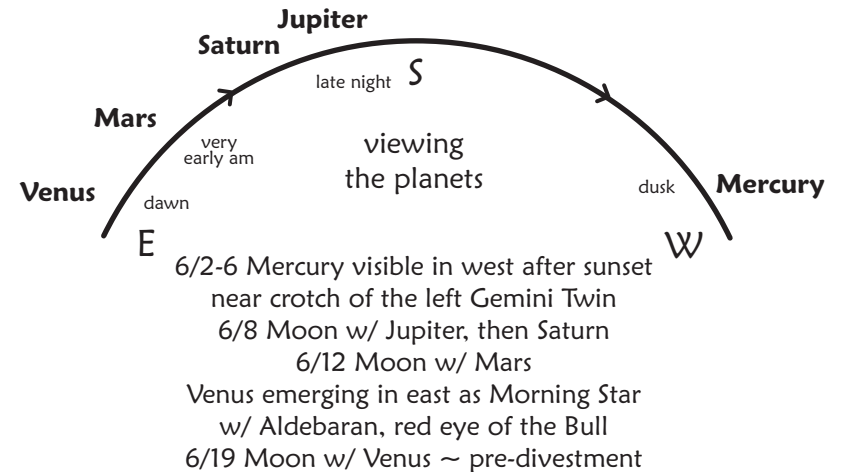

Skywalker journeys dimensionally as a way of integrating, refining our experience of the newly emerging reality with an eye toward where we've been & what's to come.

As our year of Wizard Originating draws to a close, the surrender and humility we've learned through dying to who we've been, meeting the moment, and sourcing in the Universe enable us to live as threshold dwellers, **Worldbridgers** within our beings.

An extended eclipse season opens with a Penumbral Lunar Eclipse. Venus meets Sun for an inception, a week later emerging as Morning Star, beginning a **new 584-day Venus cycle in Gemini**. Bring on the wit & stimulating conversation. Variety is the spice of life. Add in Mars with Neptune in Pisces for some embodied infinitude.

Jupiter conjunct Pluto in Capricorn draws near, ratcheting up the transformational intensity as **Storm** rolls in and the pressure builds, with occasional bolts of lightning crystallizing the new reality. Solid presence amidst the storm is what's being asked of us. **Mercury goes Retrograde in Cancer**, joining many retrograde planets, as we integrate by going back over where we've come from, with a different energetic approach. A Solar Eclipse in Cancer on Summer Solstice has Originating Wizards remembering ancestral homelands.
