

# ● Moon 1 ~ Moon of Purpose

## **Mirroring Monkey Seeds with Purpose**

initiating this year when **Wizard Meets Mirroring Storm**

Wizard encounters a sudden tempest, as **Storm** challengingly reflects the atmospheric disturbance of this moment. Destruction enlivens & renews.

Many retrograde outer planets brings a year of reflective transformation that refines and revitalizes our relations with what's beyond the human.

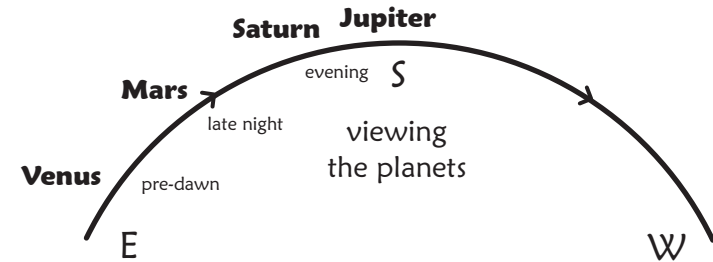

**Jupiter in Capricorn sextile Neptune in Pisces** offers the positive potential of a social-**Mirrors**-transpersonal lived story perspective and confidence in experience, that dissolves former beliefs through the work of dreaming and being in conversation with Universe, as this moment, learning how to be energy beings slowly journeying here on Earth,

Look into the mirrored-face of Full Moon in Aquarius to see glimmers of perceptual purposing toward what's ours to do in bringing about the next phase of the Age of Aquarius at Winter Solstice's Jupiter/Saturn.

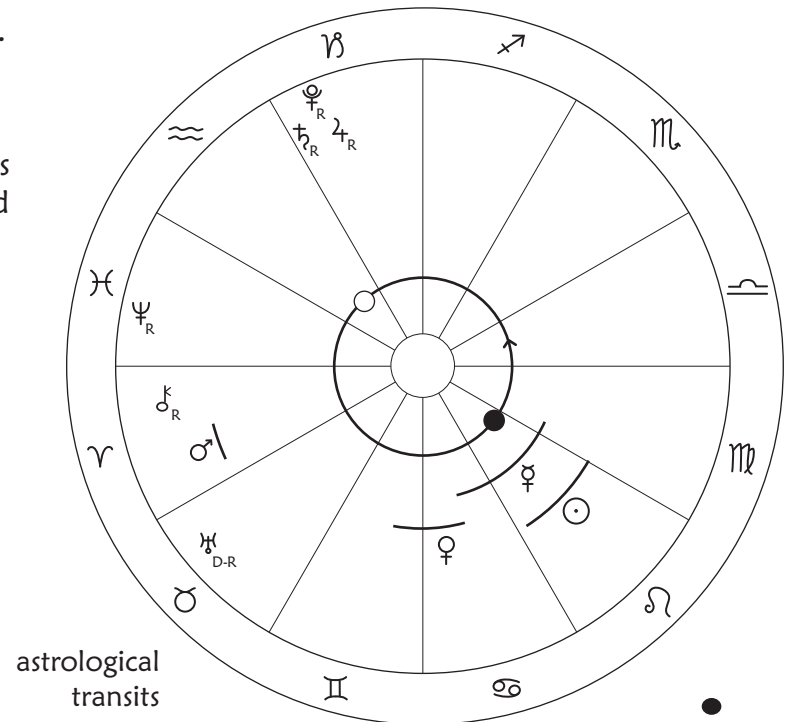

At the central moment of this themed-with-becoming-Real round of waves, **Monkey** leaps into the transformational moment, teaching us how to curiously discover a sense of playful purpose through the process of crafting a life. Venus moves from Gemini to Cancer, bringing love and valuing to home, family, and ancestors. On a really stormy day, Uranus stills, as waning Moon visits Venus to receive a laid-down scepter.

Seed sprouts a liminal portal toward the ripening of this transformation of relatedness, foreshadowing next new year's 3 Seeds on the Wind...
