

Moon 3 ~ Moon of Motion

Dogs Move through the Night as Warriors during this year when Wizard Meets Mirroring Storm

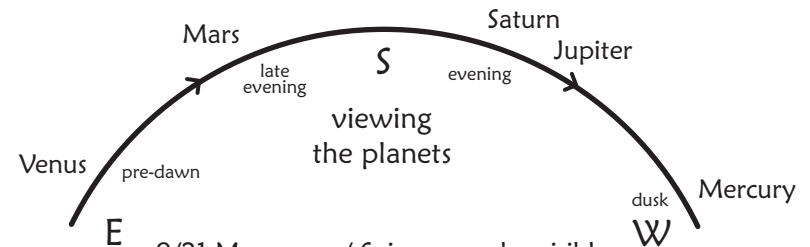

On the move, traveling with the pack, loving along the way, and loving the way, **Dog** howls from atop the mountain, calling us into attunement as Love Warriors, at the window of autumn equinox.

As **Night** falls, we come inside, dreaming stories, our home, lit by Full Moon in Aries near the redness of bright shining Mars, then Venus rises with the regal star to announce the coming of dawn. Compelling creative impulses toward living a storied-emergence-way perturb our already crumbling Capricornian foundations. Deep vitality and plentiful oomph express our abundant inner riches as we learn to move from deep within.

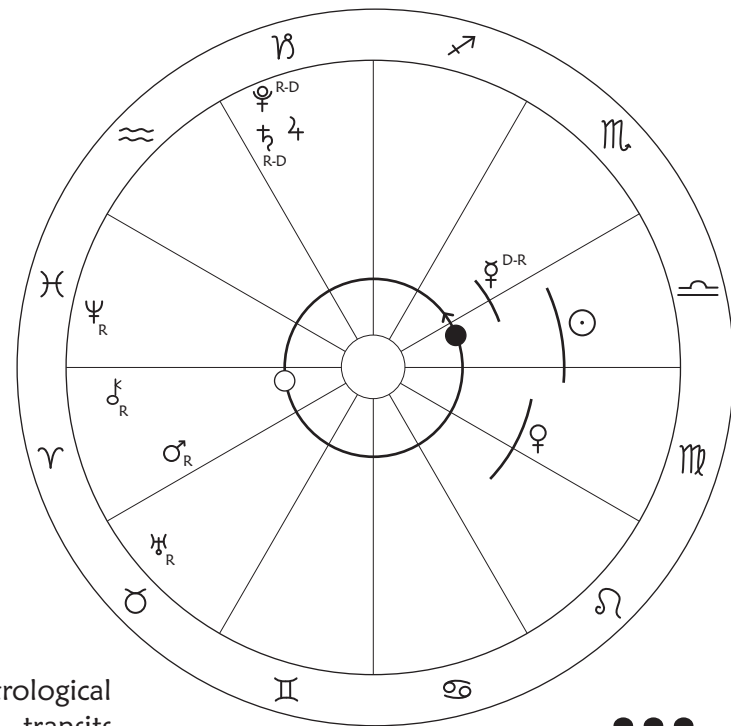

All through the Night, **Jupiter in Capricorn sextiles Neptune in Pisces**. Amidst this re-storyative work of conversing with the Universe, **Warrior** awakens within the dream, to walk, presence in motion, panther slow, steeped in power, and oozing confidence.

This brings the ripening of the ripening, seen in the reflections of Oct 13th's 3 Mirror day, as Mars in Aries rises opposite Sun, initiating a two-year cycle of embodied creativity; Mercury turns Retrograde in Scorpio, looking back over its shoulder into the potent depths, for more; and, Venus bravely removes the heart's breastplate protections, handing them to Moon for the 4th divestment.
