

Moon 5 ~ Moon of Selfhood

Wind lifts Eagle to Star Selfhood

during this year when Wizard Meets Mirroring Storm

This is a quiet moon. Hear **Wind** through the trees. As each breath fills us with spirit, we're being sung into selfhood by Life. The wind of our words speaks our selfhood. Moon shines with Jupiter & Saturn so close.

This Moon 5 brings the seemingly magical expression of real, authentic selfhood that we've been learning to embody, wave by wave, since last spring. During the coming momentous shift in Moon 6, this self we're becoming meets the world beyond our selves, and begins to step into what's ours to do in bringing about the Age of Aquarius. Let's take this time to seat in our selves deeply and fully, as bringing our selves in all our uniqueness, into meeting the world, IS what's ours to do!

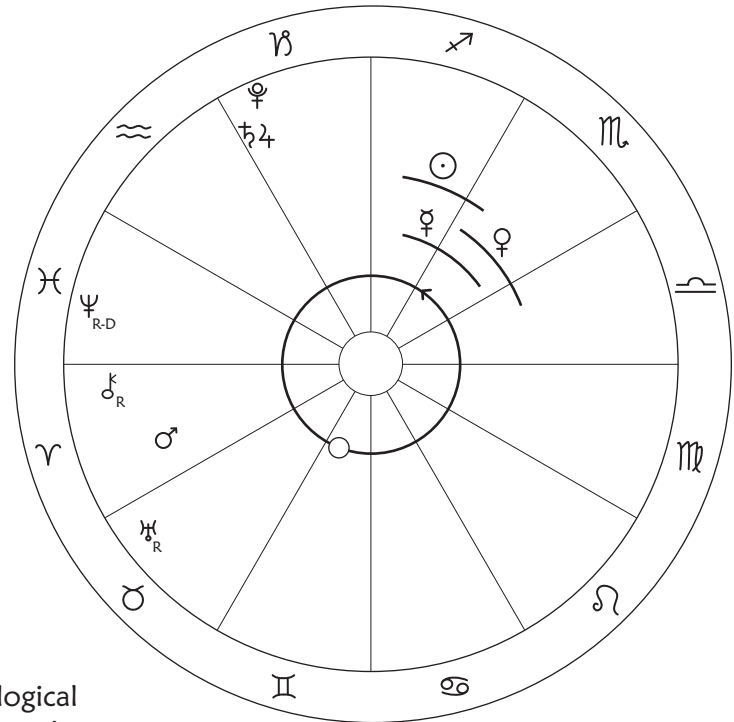

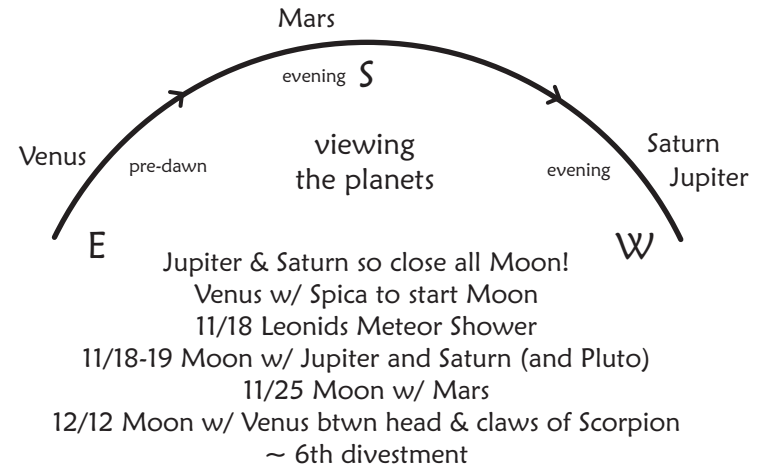

Gentle wind lifts **Eagle** into flight. Feeling the quiet feathered flapping of wings in our own bodies, soaringly free, we see the broad view, and let our screeching cry echo off the distant mountains. This is a Sun in Sagittarius, flaming arrow in flight, journey into the spacious upper realms, transformed by Neptune stationing direct visions and dreams.

A subtle penumbral eclipse of the Gemini Full Moon begins the eclipse season. Celebrate intelligence, independence, and change.

Hear and see the storied symphony of **Stars** dancing their courses across the sky, with Jupiter & Saturn cheek to cheek, as magic ripens us into fully beauty-making delicious selves. We are star-beings embodied, coming to know our selves as the Universe living as us.

Moon visits Venus for the 6th vestment, as we let drop the girdling belt. Star-soul-self all the way seated in our bodies, we flowingly move from the 2nd chakra place in our beings.
