

Moon 6 ~ Moon of Balancing

Star Balancing with Dragons and Wizards

during this year when Wizard Meets Mirroring Storm

A **Star** storm of magic showers the Dark Moon in Sagittarius Total Solar Eclipse reset of the adventure we're on, begetting a Venus entering Sag **Dragon** birth of our newly emergent selves balancingly meeting the world beyond our selves, Loving This, wave by wave.

As Dragon stretches & unfurls, slivered Moon, charged up from the power of eclipsing, visits Jupiter & Saturn low in the dusky west, escorting Saturn into Aquarius, followed by Jupiter a few days later. On Winter Solstice, **Jupiter & Saturn conjoin at 0° Aquarius**, initiating the next stage of the Age of Aquarius. As these social planets begin a new 20-year cycle, they confer upon us each a new calling into living our way and taking our place in the world, to making our contribution in helping bring about the Age of Aquarius. All this on a 7 Hand day, where we attune to what's ours to do, and how. The coming 260-day round of waves (begun by Dragon) is for learning enough that we might be able to walk and talk as this new self meeting the world in about nine-months time.

Wizard, who's 13-year journey we're in the very beginnings of, effortlessly steps in, shapeshifting to meet the world in this moment, showing us how! Balancingly bringing our uniqueness, each of us in coming together, is the essence of this new-style Aquarian revolution. Mars moves beyond Aries into the pleasures of Taurian embodiment.

- 12/14 **New Moon in Sagittarius ~ Total Solar Eclipse**
