

Moon 7 ~ Moon of Attunement

Hands raised to Sun, Skywalking Attunement

during this year when Wizard Meets Mirroring Storm

Venus disrobes, rooting in naked presence, ready to enter the underworld. Arms outstretched, we stand atop the mountain of the year, attuning to what's ours to do, and how. Present in our **Hands**, energy is touchable and shapeable as it flows through. In this newly emerging energetic experience, we learn to begin by attuning, so that embodied action can arise naturally, in time.

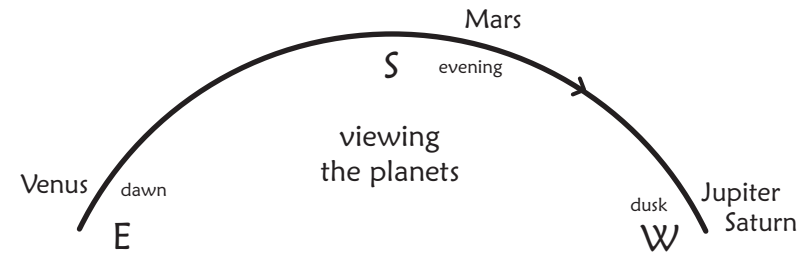

Newly-in-Aquarius, expansive visionary **Jupiter sextiles Chiron in Aries** (the healer-teacher), that we might meaningfully live our gifts, then **Jupiter challengingly squares Uranus in Taurus** (visited by Mars) toward our learning to journey by taking timely action from our pleurably- & creatively-embodied uniqueness.

With all planets in forward motion 'til late April (except Mercury retrograde for a few weeks), it's attunement, then go, time! New Moon Capricorn w/ Pluto asks for more powerfully mature work.

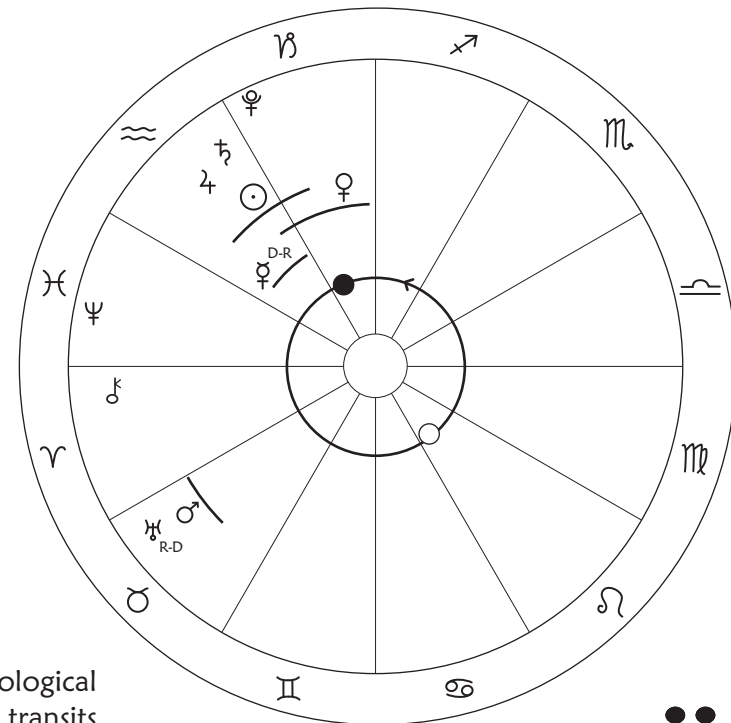

Sun radiantly bestows its warm winter light, activating attunement to a new Aquarian cup-bearing sense of identity and purpose in shining with serious Saturn, then joining abundant Jupiter as they coolly smile at the enthusiastic antics of Full Moon Leo.

Skywalker dances with wizard, showing us how to attune to ever-emergently, shapeshifting journeying as our natural way!
