

Moon 2 ~ Moon of Relatedness

Human Serpents Mirroringly Relate

as Wizard Moon Bridges Worlds

With so many retrograde planets, this is not a time of forward “progress,” but a time when we are challenged to revisit and reconsider what it is to be **Human**, relinquishing what we’ve made believe is human. Through being present, and in direct, respectful relatedness with the beyond human, we become Human.

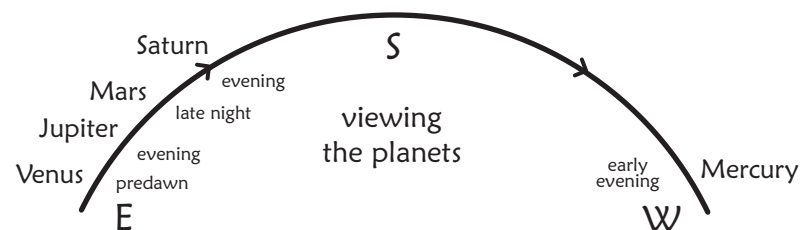

Waning Moon might just be glimpsed a final time bestowing a whispered kiss to Venus before she disappears as Morning Star to enter the under-the-world. Then, **Dark Moon Virgo** challenges us to live in practical sacred presence, moment to moment, in service to refining our Humanness as we chop wood and carry water.

Life, recognizing our humility, finds us, and fills us, through a quietly undulating **Serpent** dance, infusing and vitalizing our bodies and beings. We’re challenged to be more fully alive, moved by Life, in continual relatedness with Life. As Moon waxes, we’re layeringly embodying through a series of open portal days, in this year of us becoming portals. We transform through meeting Life as portals.

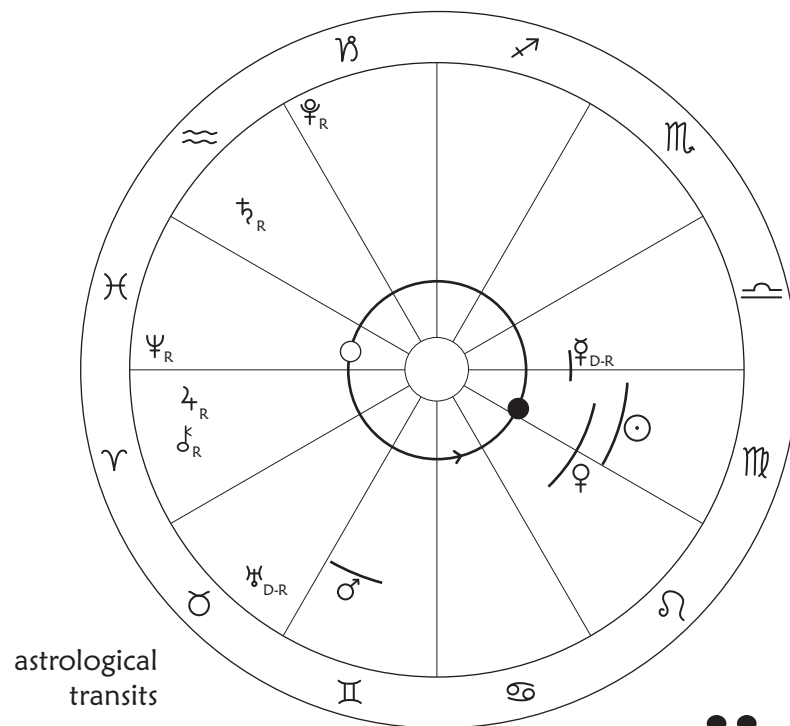

Mercury goes Retrograde in Libra, waltzing us in a relational dance of conscious partnering. Let Life lead. Be an expressive follow! We dance beneath **Full Moon in Pisces**, poised between Neptune & Jupiter, to the tune of a dream we had last spring. Now, we’re challenged to live our way into this dream, slowly, deeply, dispelling addictive illusions, journeying in the Universe as our social world.

Mirror reflects. Willing to not hold on, we transform our perceptual reality and relational experience. Be dazzled.
