

# Moon 3 ~ Moon of Motion

## **Mirroring Monkey Seeds Motion**

*as Wizard Moon Bridges Worlds*

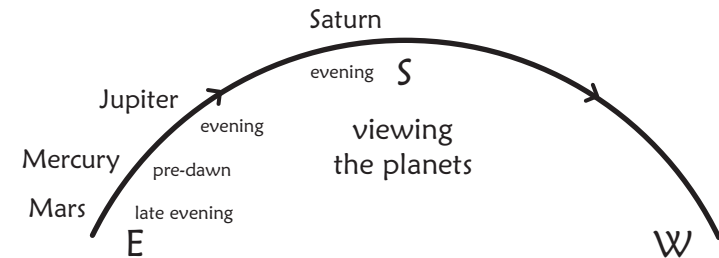

The interactions of two beget three, as the **Mirroring** motions of Autumn Equinoctial balancing transform our perceptual experience. A few days later, **Sun & Dark Moon in Libra oppose Jupiter** as Venus & Mercury conjoin nearby. This, just as we reach the center point, moment of transformation, in this 260-day Liberating round of waves. Our relational reality now moves, & dances, expansively...

As **Monkey**, dancing hands touching and shaping, we move with playful curiosity. Through continual discovery, we're crafting a life. This is a fundamental transformation of how we move, and where we move from in our beings. **Mercury goes direct** to join in the fun, while Jupiter shines at its benevolent brightest.

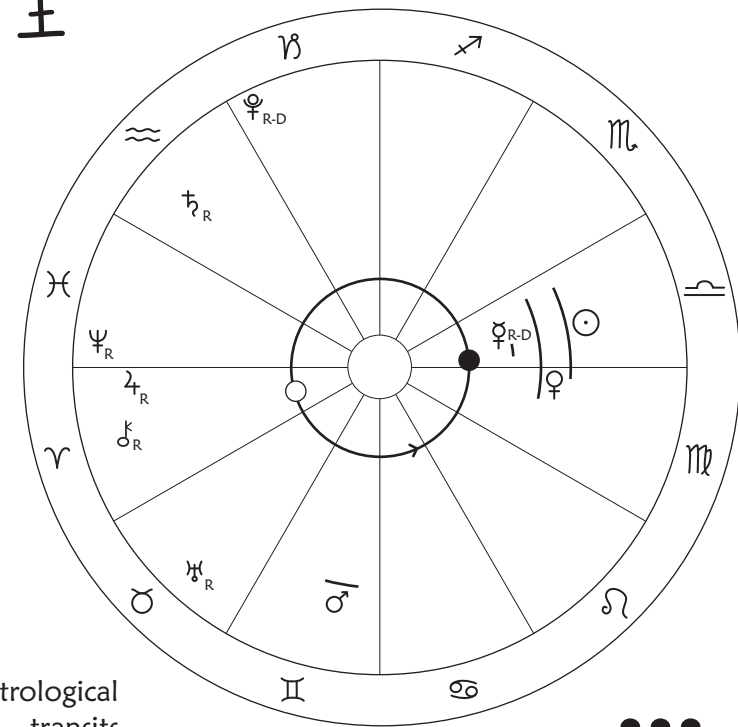

**Full Moon in Aries shines with Jupiter (and unseen Chiron)**, offering healing & teaching around journeying willingly with strength! In these conditions, **Seed** germinates & grows, organically, according to its knowing nature, in right timing, with the oomph to push up into the air & light, even as it sinks roots deep. Seed time brings a transformation in how we grow, as we open into the unfolding.

All this Moon, **Saturn squares Uranus closely**, but not exactly. Building tensions challenge us internally to take action from a place in our beings that honors time & timing, work & freedom, tradition & uniqueness. This is possible! It's time to learn by doing, by moving, by being what joins the Heavens & Earth.
