

Moon 6 ~ Moon of Balancing

Moon shines and Wind lifts Eagle Balancingly

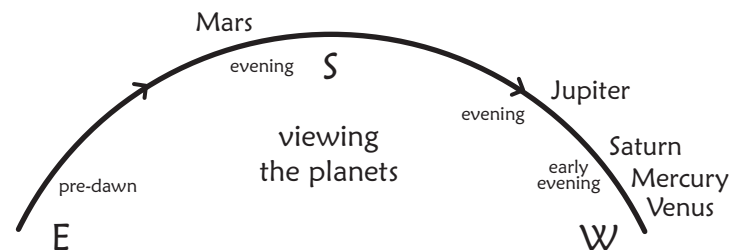

as Wizard Moon Bridges Worlds

Waning **Moon** initiates us into the quiet magic of phase-changing flow, as we enter the Green realm of Magic amidst a celebratory meteor shower. This is us, showing up as the Warrior selves we've recently become, beneath the gentle moonlight, meeting the world beyond our selves, balancingly.

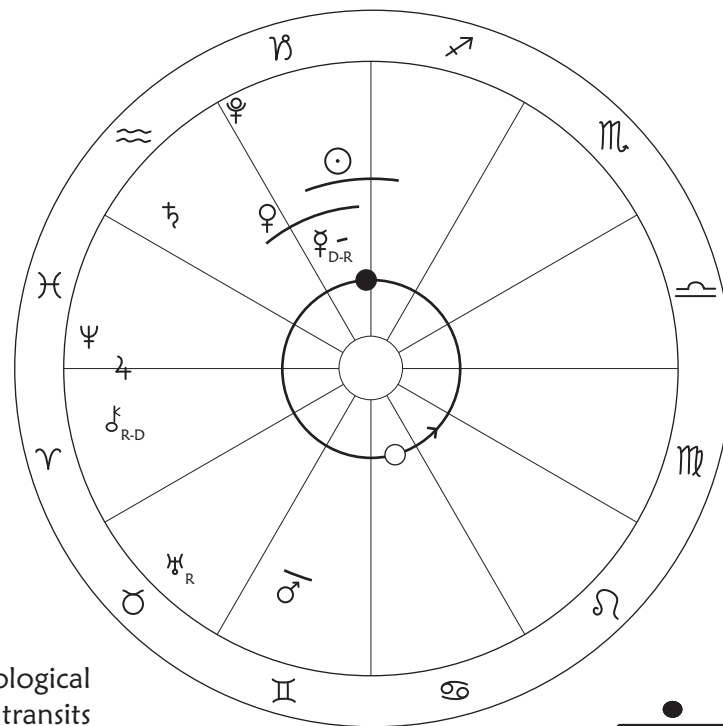

Jupiter moves into Aries once again, and we step into action, the day before Winter Solstice, echoing two years ago when we birthed a new 20-yr Aquarian Jupiter/Saturn cycle of doing what's uniquely ours to do in bringing the new reality. Now, our living of this cycle becomes more magical & social as we develop the will to actively engage with, and from within, the new energies. **Dark Moon in Capricorn** waxes to Crescent, and along with Mercury, welcomes Venus as she emerges from the underworld to shine as Evening Star, just visible now, standing naked on the half-shell dripping with beauty. This is a time for resting into mature love and devotion.

We breathe & speak, whirled within the magical dance of **Wind**, meeting, honoring, and expressing spirit & the unseen. Mercury bows to Venus, turning retrograde to re-approach all of life with serious respect. Beneath **Full Moon in Cancer** our words & songs feed Life.

Riding these prayerful utterances, we soar high as **Eagle**, reveling in freedom of flight, meeting Life within the vast expanse of Universe, welcoming spaciousness of perspective & balancing clarity.

- Venus emerges from underworld as Evening Star
- 12/14 peak of Geminids Meteor Shower
- Mercury visible around Solstice
