

# Moon 2 ~ Moon of Relatedness

## **Warrior Moon rides Wind Relating**

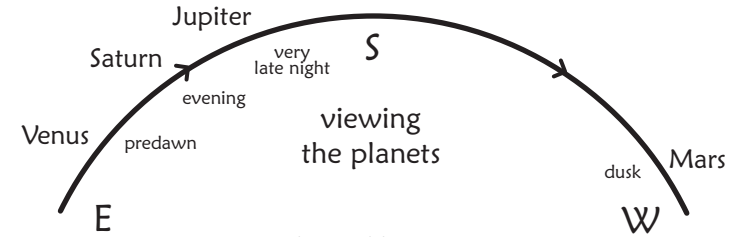

*while Wizardly Dog Selfing*

**Warrior** stands atop mountain, arms outstretched, in deep relatedness with Life, attuning to the winds, hearing the messages of spirit, as Sun moves into Virgo and **Mercury turns Retrograde in Virgo**. Much shifting directionality this Moon, with several planets turning retrograde and direct. Warrior remains present in experiencing what is slowing and shifting, rather than rushing to be somewhere else. Meeting the challenge of relatedness with embodied strength and presence, respectfully and reflectively reconsidering, Warrior is in service to and through sacred practicality. **Saturn at opposition** rises as Sun sets, shining at its brightest through the night, challenging us to live sovereign engagement — slow, rigorous relatedness with Universe.

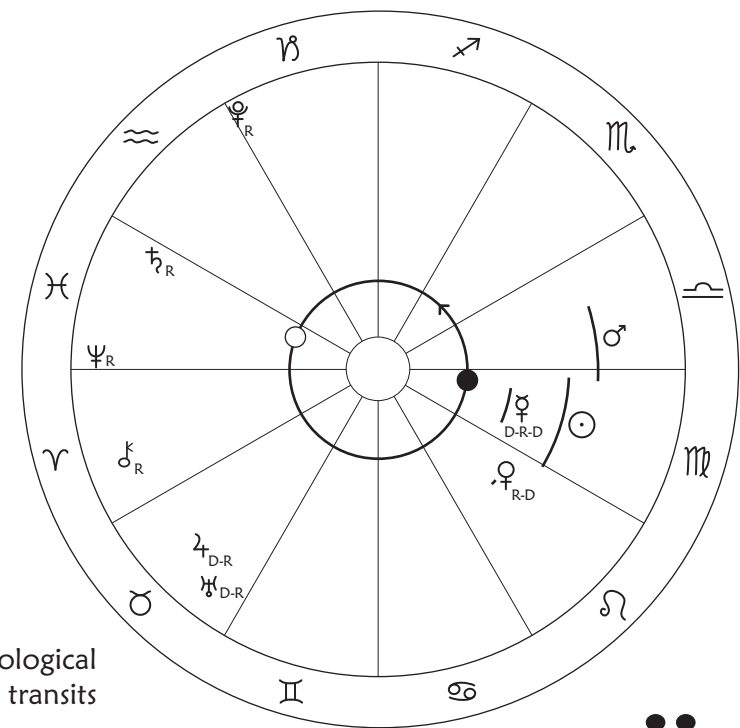

Nearby Saturn, **Full Moon in Pisces** shines us into the Moon wave, initiating the Green realm of Magic. Our growing maturity makes participation in the magic of truly loving relatedness with All of Life possible. Venus turns direct, having arisen to full bright height as Morning Star. Waning Moon brings the first divestment of Venus, relinquishing the crown, as we stand bare-headed, wide open to sky.

**Wind** breathes, in and out, speaking spirit, touch of the unseen. **Dark Moon in Virgo opposing Neptune** stories relatedness with the unfolding Universe, everything and all time, through pattern language. **Mercury turns Direct in Virgo**, joining the conversation.
