

Moon 3 ~ Moon of Motion

Wind lifts Eagle Star into elegant Motion

while Wizardly Dog Selfing

Vitalizing communion with Life through “in service to the sacred” relational conversation sets in motion the wonders of third thinginess. Relational reality dances with and is danced by **Wind**, the artfully caressing breeze of expansive magic.

Autumn Equinox brings a time for gathering together along the riversides, singing back and forth across the waters, as we weave a vessel for carrying ourselves and the seasonal changes home.

With a few flaps of its wings, **Eagle** lifts into flight, riding the wind, soaring the thermals, seeing clearly and broadly, moving with ease between earth and sky. The blessed quiet of simply flying around.

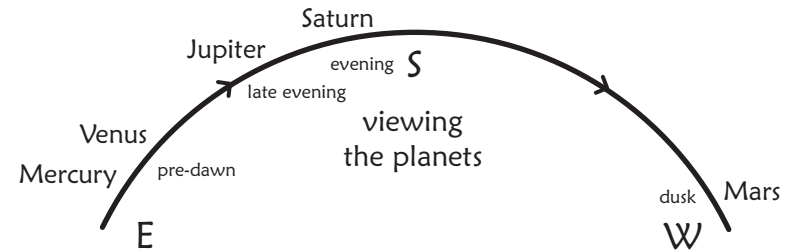

Full Moon in Aries shines upon, and stokes, our willingness...

Eagle flies so high, it returns to once again being sparkling **Star**, dancingly moving through the night, storying the seasons, gifting wonder and creative inspiration, ripening us into the magic of living attunement in action. Waning Moon visits Venus for the second divestment, laying down the pineal “third eye” scepter of sovereign perception, as we now rely upon and trust the inner seeing of our Eagle Star eye.

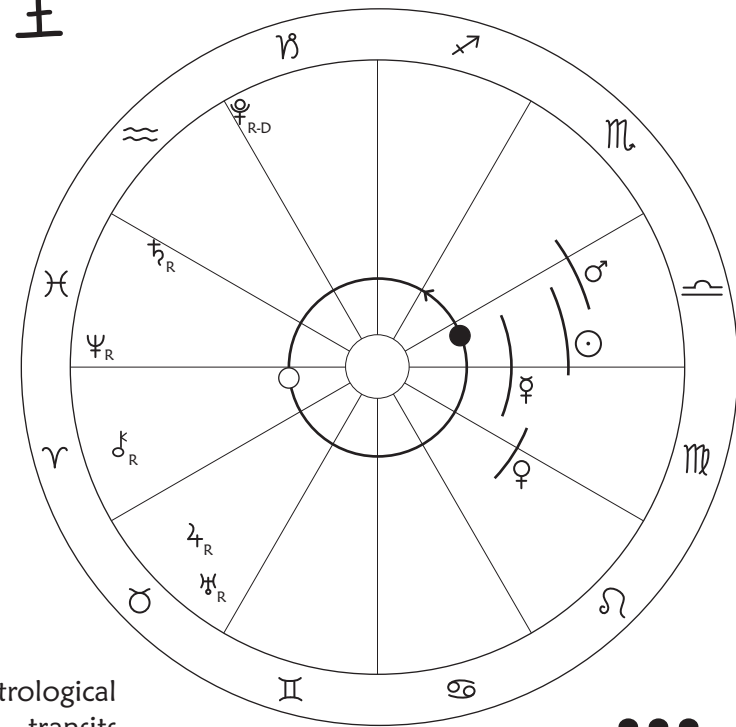

In this Wizardly Dog Selfing year, we find ourselves, on an attuning Wizard day in the Star wave, experiencing an Annular “Ring of Fire” **Solar Eclipse in Libra**. A relational reset is initiated. The back and forth, to and fro, opposition of two, meets in a waltzing dance.

By offering ourselves in love, we ripen beyond our selves.
