

Moon 4 ~ Moon of Form

Star Dragon in Wizard Form

while Wizardly Dog Selfing

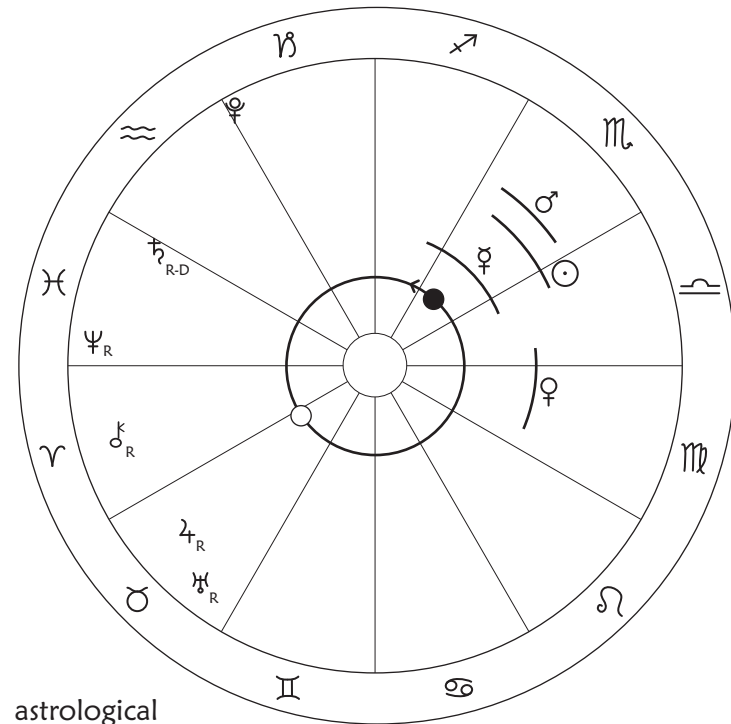

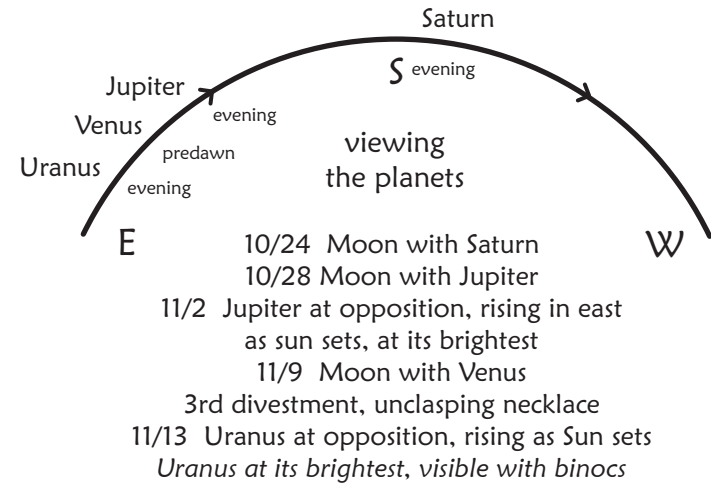

Dancing **Starness**, attuned to this from which we come, and to which we return, is all the ripened form we need in this moment.

This return delivers us to a reunion with **Dragon**, with embodied remembrance of Everything in Universe having always been here, just changing forms. This initiates a new beginning, **birthing thru Forming Anew** over the coming 260-day cycle of waves.

As the Azure Dragon lunar lodges plunge into the underworld, so too Mercury and Sun join Mars as they slip into the deep slow waters of Scorpio, trining Saturn in oceanic Pisces. Potently powerful and relentlessly transforming being, thinking, speaking, working, and showing up — these emerging new forms carry us across, between, through, and beyond, changing us, and our experience of form itself, thoroughly. We feel the shadows of this transformingness in our bodies as **Full Moon in Taurus** nearby Jupiter is partially eclipsed.

Jupiter at opposition rises as Sun sets, shining brightly thru the nights, inviting us to expansively live the pleasures of embodiment, as we move into the **Wizard** wave in this five Wizard year. This is a time for learning to be *In A Wizardly Way* — forming, reforming, and transforming — the experience of ever-shapeshifting selfhood. Moon visits Venus for the 3rd divestment unclasping of the necklace, toward naked expressiveness. **Dark Moon Scorpio** conjunct Mars opposes Uranus, sparking a revolution of embodied uniqueness.
