

Moon 5 ~ Moon of Selfhood

Wizard Hands lift Sun into Skywalking Selfhood while Wizardly Dog Selfing

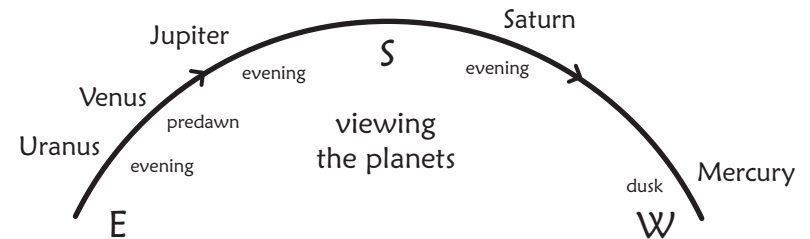

We come to know ourselves through Wizardly Ways, as we shapeshift in freedom, bridging worlds, in this **Wizard** year of selfing. Uranus is still at opposition, shining bright and close, maybe even visibly, as the immediate, unpredictable, timeliness of Wizardly selfing refines our new beginning.

With our Wizard **Hands**, we touch and shape, being made into through our making, transforming our new beginning in form. Sun and Mars come together trine Neptune, sextile Pluto, and square Saturn thru much of this wave, inspiring our will(ingness) to (be in) action, hands on, showing up as Self. **Full Moon in Gemini** is a time for walking beneath the moonlight holding hands, maybe even skipping and swinging our arms, chattering belovedly.

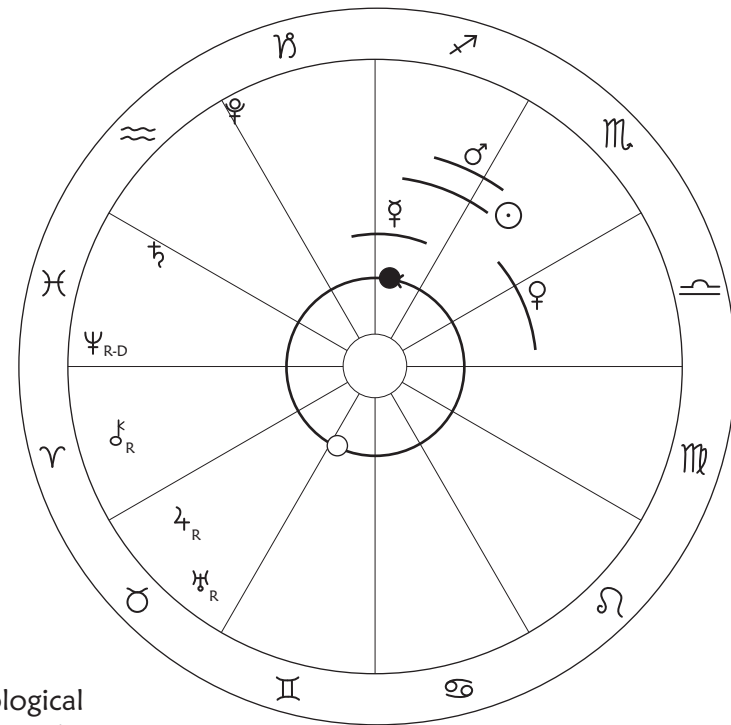

Then, **Sun** comes out and shines. Warmly and generously radiating is enough. Bestowing by simply being our selves ripens our new beginning. Leading up Sun in the east before dawn is the herald, Venus. Along comes visiting Moon for the 4th divestment of the heart amulet, relinquishing protections that have become limiting armor. Strong in our fullness of heartfelt presence, shining is protection enough.

We embark as selves upon a **Skywalking** journey during **Dark Moon in Sagittarius**, momentarily to meet the world beyond ourselves, We are the journey!!
