

Moon 7 ~ Moon of Attunement

Stormy Humaning Serpents us into Attunement

while Wizardly Dog Selfing

High up on the wind-carved mountain peak of this *Wizardly Dog Selfing* year, amidst an actively energizing **Storm**, thunder beings gather, inviting us to tune in, transforming what we're attuned to. On a dark and Stormy night, with **Dark Moon in Capricorn** square Chiron the Wounded Healer/Teacher, gradualness and grace carry us along the inward turning beauty way, toward living a new energetic story and reality.

From the womb of our original mountain cave, a new **Human** emerges, even as Sun and Pluto join together, stepping from Capricorn into Aquarius. The most personal and transpersonal layers and dimensions of being and communing are attuning us to the real real world, and the mysterious new energetic reality. **Full Moon in Leo** inspires enthusiasm for the ripening & refining of this new Human form, further sparked as Uranus stations Direct.

Serpent undulates, a transformational dance of embodying cosmic energies as they flow down and through our bodies and beings into the world. Mercury moves into Aquarius, conjoining with Pluto as a portal opens, and stays open. Our perceptual, communicative, and learning functions and experiences transform powerfully and profoundly.
