

# Moon 10 ~ Moon of Manifestation

## **Earth Dogs Roam the Night Manifesting**

*while Wizardly Dog Selfing*

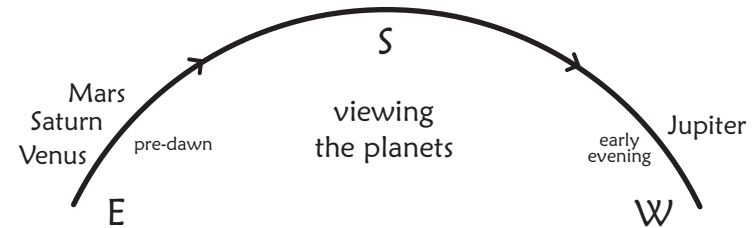

Here we are, living **Earth**. Waning Moon joins with Venus — fully divested, ever so faint and naked as Morning Star — for the final time, mentoringly escorting Venus into the underworld.

Momentous happenings ensue as the 13-day **Dog** wave (which led us into the New Year in July) comes around again. Heartfulness is initiated by a very visible and wide-ranging **Total Solar Eclipse in Aries conjunct Chiron the Wounded Healer / Teacher!!**

Life is shifting our sense of purpose and identity, inviting us to show up as Love in a spontaneously emergent way, healing and teaching through being manifest, living our gifts! Just a handful of days later (on 4/12), comes the **Wizardly Dog Selfing** Walking & Talking day of this (July to July) year. Time to walk and talk our new selfhood!

All the while, this whole Moon (and beyond), **Jupiter & Uranus** in Taurus dance close, cheek to cheek as we shift from Dog into the deep dreaming of being at home within storied **Night**. Life is imbued with an electrifying, energizing quality, in an earthy, being with the new energies of this time and taking action in a “grounded and enjoying the pleasures of embodiment” way! **Full Moon shines in Scorpio and Mercury turns Direct**. It’s not about ascending, but descending, as the new energy embodied!
