

Moon 11 ~ Moon of Liberation

Night Warrior releases into Moon Liberation

while Wizardly Dog Selfing

As Pluto stations retrograde in Aquarius, **Night** releases us through our turning inward, going down into the deep...

We're liberated to become more fully **Warrior**, to be present and embodied, courageous and strong, in releasing what helped get us here, but no longer serves, as we ripen into the next level of beingness. **Dark Moon in Taurus with Jupiter and Uranus** (amidst the Eta Aquarids meteor shower) infuses us with expansive, timely energy for living embodied presence, uniquely!

Now, we've ripened enough to meet the tidal waxings & wanings, the face-changing phases of **Moon**, initiating us into the liberating realm of Magic. **Full Moon in Sagittarius** shines its divinatory light upon our journeying. Meanwhile, the positive potentiality of **Venus & Jupiter in Taurus sextile Neptune in Pisces** embodies loving and living in the vast unfolding Universe. Then, unseen in the underworld, but certainly felt, Venus and **Jupiter move into Gemini**, starting a "liberating release through changeability" party. This Moon ends as the Moon wave ends, a very clear moment of completion, punctuated by Mars conjunct Chiron.
