

Moon 9 ~ Moon of Realization

Monkey Seeds Earthly Realness

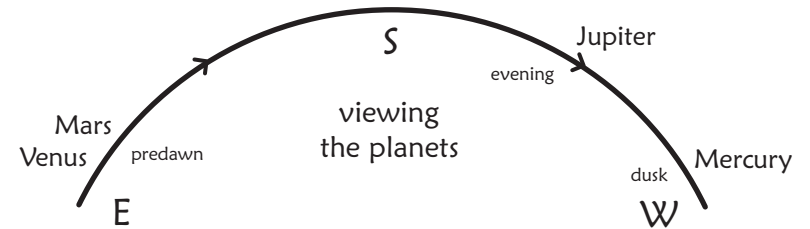

while Wizardly Dog Selfing

Monkeying around in the Universe, our ongoing explorations and discoveries make us more real as we transformingly craft a life. Moon visits Venus for the 7th divestment, dropping of the root chakra robes. We stand naked in our beingness, bobbing around and communing in the imaginably dream-rich oceanic waters with Neptune and **Dark Pisces Moon**.

From these unfathomable depths, **Seed** sprouts, opening us into an ongoing portal of organic growthfulness, amidst the warmth and brightness of returning **Sun in Aries** springing forth. Emerging, transforming, ripening, these are the layers of beingness through which we're becoming real. **Full Moon in Libra** is glancingly eclipsed by subtle shadow. Softening and balancing our relatedness approaches with all of Life, we emerge from the portals to walk strongly and freely as the presence of realness.

Really being here, on **Earth**, shifting with the shiftingness of the tectonic plates of Gaia's body, navigating by synchronicity, begins to more fully mature and ripen us. **Mercury turns Retrograde** in Aries, as we re-approach our willingness, in thought and word, to live the spontaneous emergence of self-expression. Be real.
