

Moon 6 ~ Moon of Balancing

Earth Dogs roam Night Balancingly

while Storm Wizard Balancing

Here we are on **Earth, Full Moon in Gemini** shining with Jupiter nearby amidst a Geminids meteor shower, invited to continually meet the world beyond our selves, as our selves.

Mercury turns Direct in Sagittarius, beckoning us to follow the guiding divinatory speech of the world.

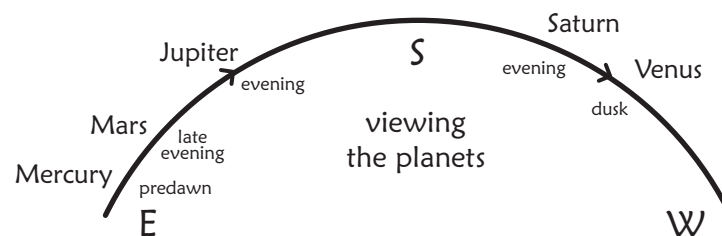

Sun moves into Capricorn at **Winter Solstice**, marking the southernmost cornerposts of the House of Sun and Moon we live within here on Earth. Aligning with the real real world story, we experience being at home on Earth in Universe in real ways.

In this deepening into winter time, comes **Dog**, playing in the snow, meeting life with, and as, love, before curling up by the fire. Balancing play, work, and rest is the learning. For the 2nd of 3 times this year **Jupiter squares Saturn**, echoing the tension that's challenging us to converse and learn expansively while moving slowly with real devotion amidst unfolding storied Universe.

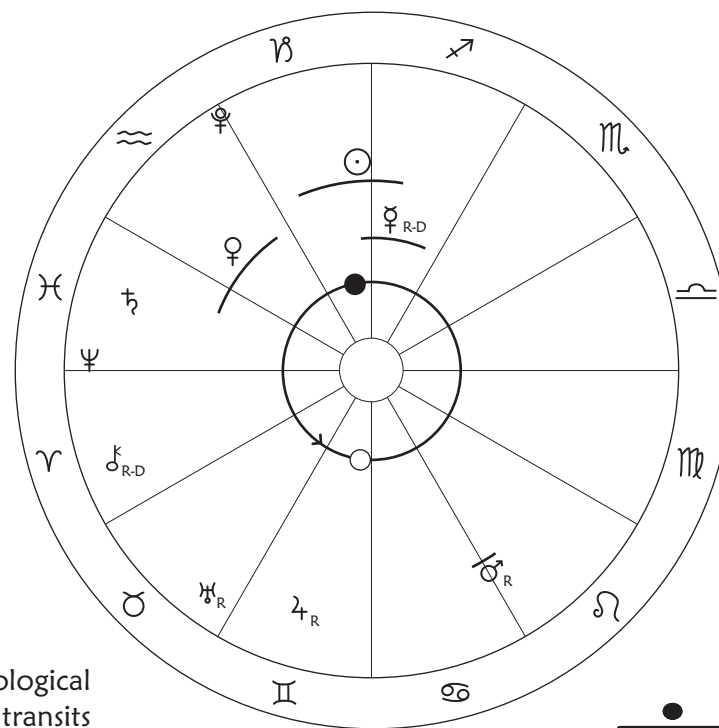

New Moon in Capricorn takes seriously, self-respect growing through honoring. Moon waxes to join brightly shining Venus, conferring a 6th vestment pineal scepter of perceptual integrity.

Night falls, the deep dreaming dark of the year, calling us inward to quiet intimate tellings. **Mars Retrogrades back into Cancer**, that we might fill our cups with embodied belonging.
