

# Moon 11 ~ Moon of Liberation

## **Seed Earths and Dog Liberates** as **Seed Mirrors Attuningly**

In this fecund Taurian time, comes the Seed wave in this Seed year. Here in the Moon of Liberation, we're invited to become more fertile and growthful **Seed** beings, sproutingly selfing.

Attuning to the harmonious newness of the Field, continually activated as the personal planets cruise thru, opens a ripening portal of transformation. Noticing ways of being and experiencing that have become dissonant and no longer serve, we simply and instantly release, allowing them to dissolve, like a seed in its readiness bursting forth from its casing, liberated growthfulness.

Sprouting seeds move soil aside in pushing thru to the next level of air and sunlight (while staying rooted in earthy moistness), to live as emergent selves on **Earth**. A subtle maturation is initiated. **New Moon in Taurus** pulses with fertility as **Mars conjuncts Chiron in Aries & Mercury communes w/ Uranus in Gemini**, each in signs they rule. Willingly embodied action heals and teaches through direct transmission while learning conversations bring liberation. Crescent Moon visits Evening Star Venus to confer the 3rd vestment solar plexus ring of power. Sun moves into Gemini, knowing itself as improvisational Uranian uniqueness.

Liberated, **Dog** runs with its pack of actual humans and beyond human, in and as Love.
