

Moon 2 ~ Moon of Relatedness

Seed Earths while Dog Meets in Relatedness as **Seed Mirrors Attuningly**

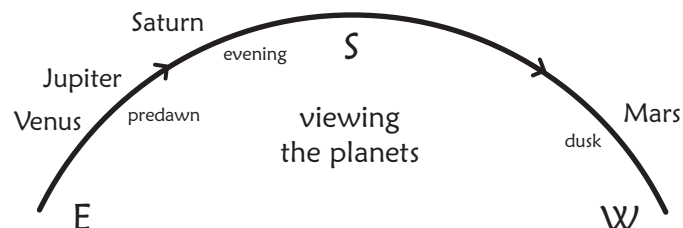

Seeding the Field, Venus in Leo engages in relatedness generously, valuingly, and powerfully. We're invited to meet the challenge of relatedness organically and growthfully, showing up as love, rather than colonizing in an attempt to get what we think we want.

Uranus in Gemini sextile Neptune in Aries offers the potentiality of living a revolutionary new story, in intimate conversational relatedness with the beyond human, in emergently storying Universe.

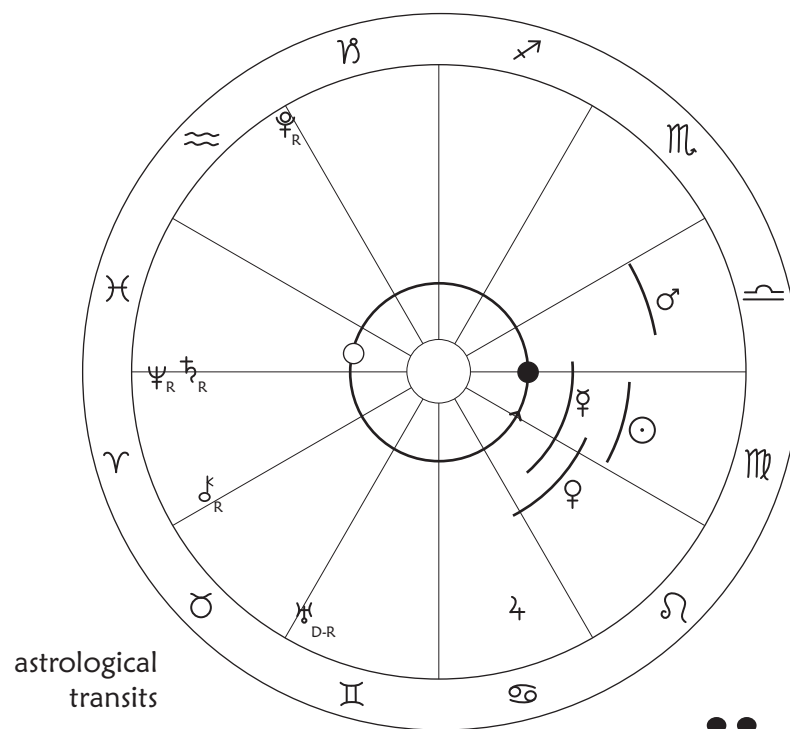

This is **Earth** shaking! Tectonic plates of Earth and being shift swiftly, suddenly, and deeply. There may be tsunamis. We meet the challenges of each moment by staying present. **Saturn retrogrades into Pisces**, reminding us to be real, remaining in touch with the oceanic mystery we're emerging from, rather than trying to make progress by getting somewhere else. **Total Lunar Eclipse in Pisces** resets our relatedness with Universe, washing away old stories and immersing us in living artful dancing musicality, in every moment.

Dog comes along, inviting us to be love(d). As Mercury joins the Field, we may find ourselves conversing intimately and lovingly with all of Life. Moon joins Morning Star Venus, kissing the bright Heart of Lion (then moving into Virgo), for the 6th divestment dropping of the girdling belt, challenging us to reside in and move from 2nd chakra/dan tian/hara, embodying everyday sacredness...
