

# Moon 3 ~ Moon of Motion

## **Dog roams Night, Warrior in Motion** as **Seed Mirrors Attuningly**

**Dog** on the move, roaming with beloveds, lives Love. The practically sacred **New Moon in Virgo Partial Solar Eclipse** opposing Saturn in Pisces at its brightest resets our sense of responsibility for living in real restful motion, in day to day devotedly intimate relatedness with Sky, Water, and Earth.

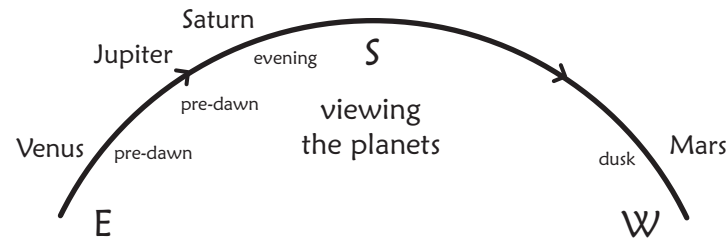

**Sun into Libra ~ Autumn Equinox** is a time for gathering together along the riversides, singing back and forth across the waters, as we weave a vessel for carrying ourselves and the seasonal changes homeward, toward the yin of the year. True relatedness happens in motion.

As Sun dips below the horizon, in touch with the vivifying Field, **Night** falls. Entering is a way of being in motion, coming home to dreaming within. Move willingly, in and with, the murmurings of dark mystery.

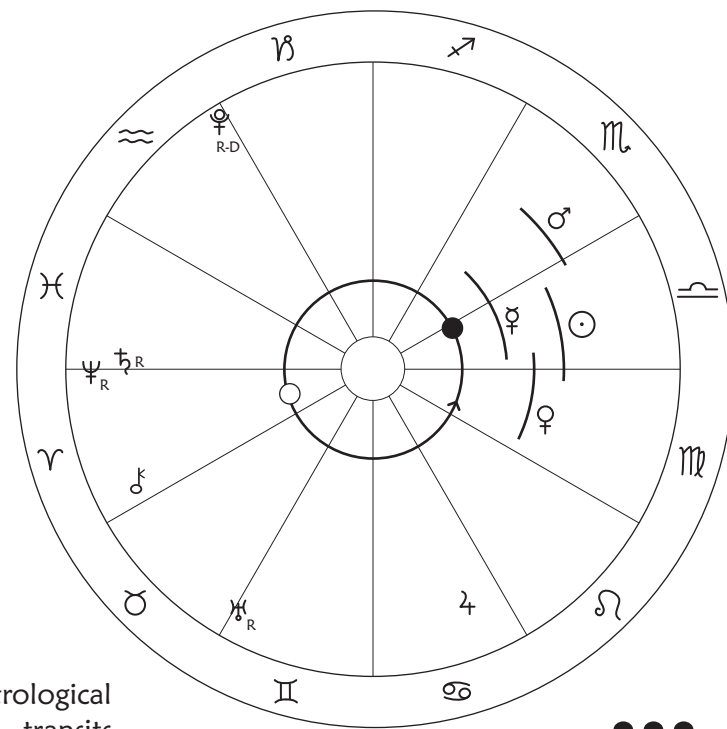

Moving freely amidst new realities in embodied presence, **Warrior** ripens, dancing strongly under **Full Moon in Aries**.

Venus moves into its Libran home sign, gentling as it communes with the Field, inhaling and exhaling a Grand Air Trine with Pluto and Uranus. How harmoniously humming as loving respectful presence within the Field of Aliveness can you be?!
