Moon 5 ~ Moon of Selfhood

Storming Human Serpents Selfhood

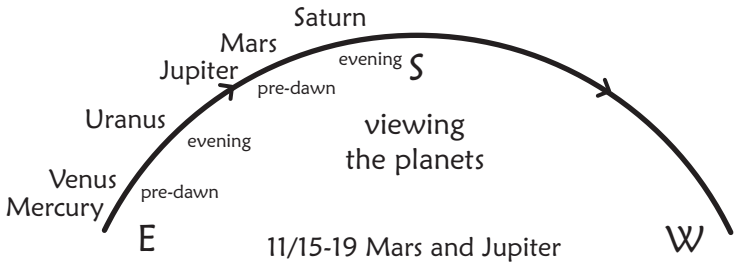

as Moon Rides Wind

We come to know ourselves as emergent energetic **Storms** of Selfhood, Living Relationally within ever-shifting atmospheric conditions. Jupiter and Mars can be seen shining together predawn in the East with the star Regulus, the Heart of Lion. Such expansive strength of creative generosity invites us to show up and contribute. **Full Moon in Gemini conjunct Uranus** shines between the Pleiades & Hyades, electrifying our intimate Conversation with Life.

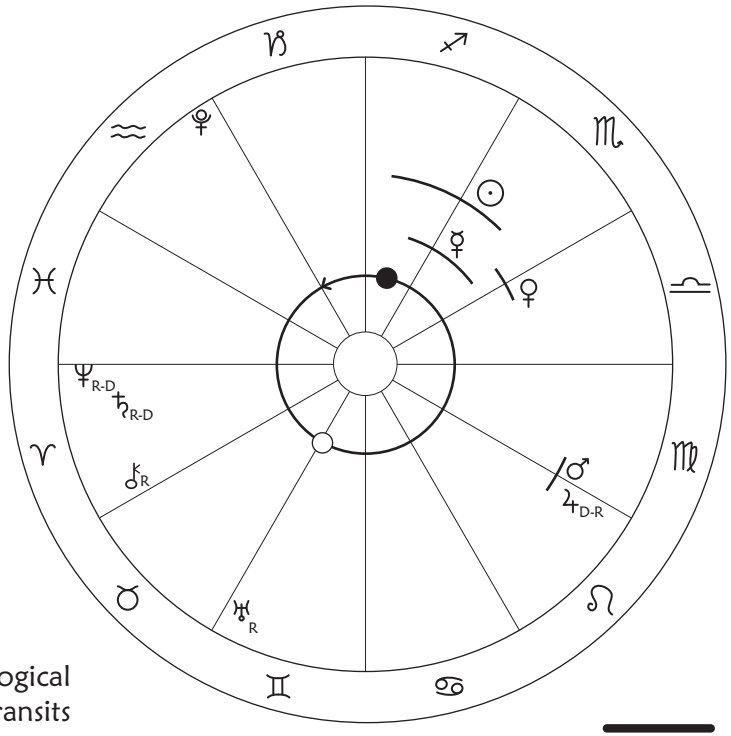

This moment refines our authentic experiencing and expression of **Human** selfhood, in presence, flowing with the Field of relational Air **Uranus in Gemini trine Pluto in Aquarius**, while also flowing with the Field of actively engaging Fire **Jupiter in Leo trine Chiron in Aries**. Moon visits Morning Star Venus near the star Spica for the 1st divestment relinquishing of the Crown, at the potent Living Relationally cusp of Libra/Scorpio, where this new Venus cycle began. **New Moon in Sagittarius** moves us toward journeying this transformational moment as expressions of, and participants in, actual Human culture.

Serpent portals open, pouring dimensional selfhood through our bodies and beings, filling us with vitality fed by Living Relationally in, and with, the new Field of Aliveness. This brings much directional shifting, to keep us right here ~ Saturn & Neptune go Direct & Jupiter moves Retrograde.
